

CD Overview Voiceover Script

At J.D. Edwards, we are committed to making you — our customers — stronger. That's why we are continuously listening to your needs, creating innovative solutions, and delivering quality products and services that will enhance our partnership with you.

To that end, the WorldSoftware Organization has made many new product enhancements and integrations since its inception in June 2000. One such enhancement is a collection of self-service programs. With these applications, you can extend your WorldSoftware functionality to your employees, partners, suppliers, and customers via the Internet, giving them the ability to access the information they need when they need it.

Migration is also a main focus of our organization. Regardless of your migration strategy, we are committed to helping you preserve the value obtained from WorldSoftware when making your move to OneWorld.

Recently, we unveiled the first in a series of migration tools designed to streamline and speed your migration to OneWorld. The FASTR Conversion Tool allows you to reduce the time required to convert your FASTR reports by as much as 75% by automating the conversion of these reports. To save you even more time and money, we've also developed the DREAMWriter Conversion Tool, which automates the conversion of DREAMWriter versions and processing options.

Take a moment to review this CD-ROM, which features product information and demonstrations of these self-service applications and migration tools. We're confident you'll see how these exciting tools and applications can help make your business stronger.
