

# VATICAN STAR MAP OF ORION

The purpose of this illustration is to suggest that the Vatican complex in Rome is patterned after the cosmic alignment of Sirius to the Pleiades. The religion of Nimrod, the 1st Mason after the Flood of Noah. It sets the Queen of Heaven, Lucifer as Sirius and his consort, Orion with its complimentary sexual union at the Obelisk. It is a rendition of the phallus or Shaft of Baal. Wherever there is a dome and obelisk architecture, it is a euphemism of this Sirius and Orion union that 'impregnates' the vector as if a 'Manchild' is to be birthed. The Piazza with the Obelisk and 2 fountains correspond to the Belt stars of Orion. From the Altar of the Basilica which means throne to the Obelisk or phallus of Osiris is 999 ft. This is the quest of the Roman religion that will birth the AntiChrist Manchild. The Bible portrays this conspiracy of the true revelation of the Christ and King of Glory that was brought forth as the true Savior of the World. It states that the habitation of this place is the abode of demons and every foul and filthy entry. It is the stronghold of the Fallen Angels that corresponds the Castel Sant'Angelo pentagon.

This is Mystery Babylon, the antitype of the Virgin of Christ as compared to in the book of Revelation. One reason why this portion of the cosmos or Mazzaroth is so inscribed around the world in the most prominent of places and temples of the world capitals is that this region has the concentration of the brightest stars in the Universe.

This region is said to be where the Fallen Angel and their 'Queen' Lucifer rebelled from and were expelled from, thus the very Throne of the Creator, YHVH. This cosmic composition superimposed over the Vatican is a counterfeit of the real association that is defining the work of Jesus Christ the true Orion, Sirius taking the wrath of YHVH or as it were Taurus on the cross for the sins of the Pleiades, the Virgins, the 7 Churches of Asia to ready as a Bride.

The fortress perimeter is 2520 ft based on approximate GoogleEarth coordinates. In the Luciferian antitype, the center of the fortress pentagon is the 'Eye of Lucifer' corresponding to star Aldebaran. From the Alter of the Basilica to the center of the fortress is about 33 arcseconds. This stronghold satanic pentagram corresponds to the 5 stars of the Hyades in the head of Taurus with the prominent one being Aldebaran.

Even some of the city street ley-line and directions match the cosmic angles of the constellation motifs. The Pleiades star cluster corresponds to the area of the Supreme Court or highest segments of the land. In turn the corresponding depiction topographically of the Pleiades is across the Field of Mars, Campus Martius and centered on the ancient Roman Forum.

The Roman Forum is encompassed by the 7 Hills of the Harlot. This is but a segment of the entire storyline of each of the 12 Signs of the Mazzaroth or Zodiac. As the constellations are in phi ratio to each other and in themselves, the Obelisk of Orion in the Piazza is in approximate phi ratio to the Altar in the Basilica. The 'Eye of Lucifer' or Aldebaran at the Fortress of the Angels is in approximate phi ratio to the Altar in the Basilica, etc.
