## WORLDWIDE TELESCOPE - SAME COVER UP 'ANOMALY'

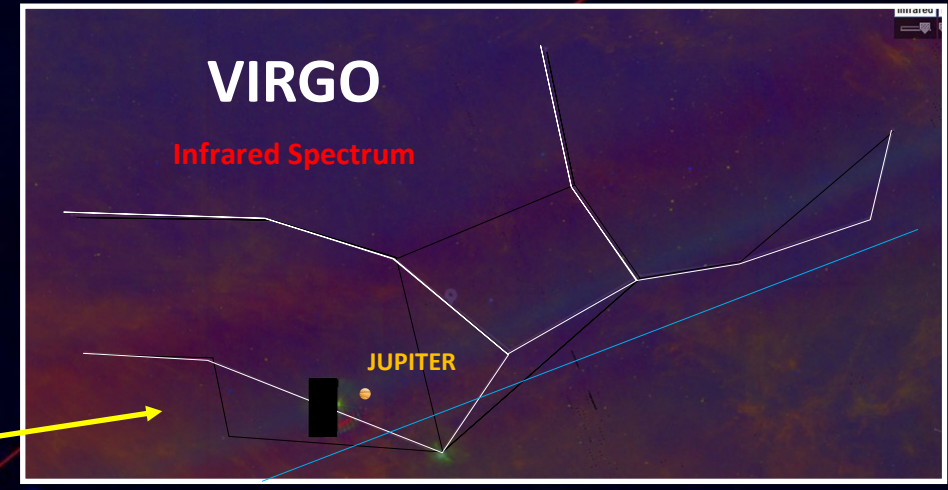

September 22, 2017 - Eve of Sabbath of Return

13h 50m 44.0s -8° 13' 59.7"

Same area patched-up as in Google Sky 'Red Dragon' anomaly.

ECLIPTIC

The purpose of this illustration is to demonstrate that the GoogleSky 'cover-up' is also depicted in the Microsoft's *WorldWide Telescope* program. The quadrant where the 'Red Dragon' anomaly is patched-up in the constellation *Virgo* will be in front of *Jupiter* is positioned on the day that it is believed will astronomical fulfill the Revelation 12 Sign. The position of *Jupiter* on the 23rd of September, 2017 will coincide with the *Sabbath of Return*. It will also be when Jupiter is 13 days out from the delineation of the 'Womb' area of *Virgo* as some interpret the 'line of birthing' to have occurred on the 9th of September. This evidence is in no way asserting that such an anomaly is Planet X.
