

Deployable Response Shelters

The DMI Series Shelters are ready for use in less than 6 minutes with 2 to 3 people. Compact, lightweight, and modular, the DMI Series Shelters are the perfect solution for first responders when reliability and speed are crucial. Their speed and ease of deployment make them the ideal solution for emergency care, command posts, mortuary, or all-purpose emergency shelters.

The resistance and robust construction of the DMI Shelters, along with a set of accessories ensure an efficient use of any kind of land. All Shelters can be carried by hand to the place of use.

Thanks to their modular design, the DMI Shelters can be connected to each other in any direction (gable doors and side doors). The tent is made of durable, fire and UV resistant PVC coated fabric (military grade 22 oz/sqyd), using HF welding to construct the cover and floor into one enclosure.

Standard features :

- Protective ground sheet
- Connection module between tents.
- Modular airframe with double inflation valves, over-pressure valves and deflation valves.
- Wide opening doors with triple zippers and water barrier.
- Pre-fitted docking sleeves around doors.
- Removable floor of heavy-duty and non-slip PVC coated polyester.
- Windows with 3-way system with both mesh and clear PVC front.
- 2 duct openings for HVAC.
- Pre-fitted guy ropes.
- Packed in sturdy PVC transport bag, complete with pegs, hammer, repair kit and user manual.

Fabric colors : White, Orange, Desert Sand, and Dark Green (Other colors on request)

Load Resistances:

Wind: 65MPH
Snow: 3.1lb/sqft
