BE SURE TO SCALE PRINT BEFORE SIZING

If your foot width is line to line order medium size boots

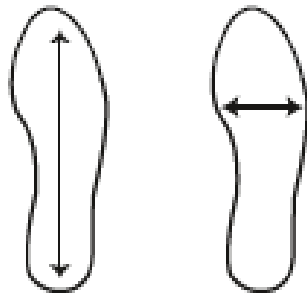

Use legal size paper and print actual size

Kenetrek
Boots
FOR THE TRAIL LESS TRAVELED®

IN A NORMAL STANCE PUT EQUAL WEIGHT ON CHART WHEN SIZING

REMINDER:

Be sure to leave shoes off when using this chart to determine your size.

PLACE HEEL HERE

Consider **WIDE WIDTH** if your **FOOT** occupies this grey area.

1.) CHECK THE SCALE

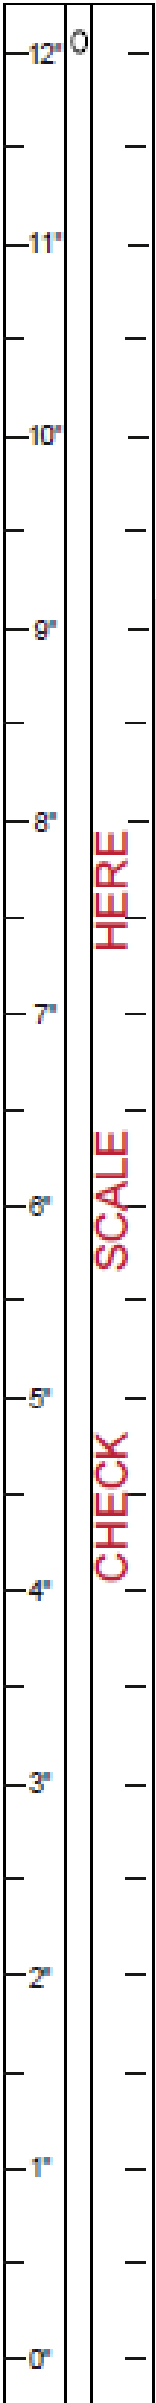

If you printed, faxed or copied this chart, check the scale with a ruler at the left edge.

2.) FIND YOUR SIZE

Align your heel with the line at the base of the chart, it may help to fold the paper on the dotted line. Keeping your weight on your foot, relax your toes. The line that touches your longest toe indicates your size. The shorter lines in between indicate half sizes. Many people have feet of different sizes, measure both feet and select the larger size.

3.) FIND YOUR WIDTH

When measuring your right foot, align your ball joint with the solid line on the left side of the chart. If the outside of your right foot reaches into the grey area on the right, consider a wide width. Repeat with your left foot: align your ball joint with the solid line on the right side of the chart. If the outside of your left foot reaches into the grey area on the left, consider a wide width.
