REVOLUTIONIZING THE WAY AIRCRAFT ARE CLEANED

LOWER ENVIRONMENTAL IMPACT, FASTER TURNAROUND, MILLIONS IN SAVINGS

Current airline grooming practices kill too many trees, fill too many landfills, and slow turnaround time. Inflight crews rely largely on clunky cleaning kits, juggling between gloves, spray bottles, cloths, paper towel and old style mops to deal with aircraft messes.

No more pushing around messes with dirty cloths. The moppitt™ compact all-in-one touchless cleaning system is changing the way inflight messes are managed. Its disposable but sustainable cartridges and non-toxic biodegradable industry approved cleaning solution reduce wear and tear on airline assets, staff and the environment.

moppitt™ saves time, resources and money. With moppitt™, inflight crews have the power to effectively address inflight accidents, clean lavatories, galleys and passenger spaces without having to touch the mess or risk contamination of staff and passengers. Our estimates show that by reducing illness of IFC by 3 days/year our system can net \$4.5 million annual savings.

AIRCRAFT CLEANING HAS BECOME MORE SUSTAINABLE

1. Biodegradable industry approved cleaning solution

moppitt™ cleaning pads come pre-moistened with non-toxic, biodegradable interior cleaners from Celeste Industries Corporation. Celeste cleaning solutions are a sustainable alternative to harsh toxic chemicals that allow airline staff to clean surfaces without staining plastics or damaging the environment.

2. Recyclable PODS & Cartridges

Unlike disposable paper towels and reusable cloths, moppitt™ sealed PODS and Cartridges (pre-moistened with biodegradable industry approved cleaning solution by Celeste Industries Corporation) clip right into the Dispenser, Extenda-Pole or Hand-Held Accessory, can be ejected and recycled without ever touching the cleaning pad, and reduce overall landfill waste.

MORE COMPACT AND VERSATILE THAN EVER

Introducing our three new revolutionary cleaning products, designed to be more compact than ever because every pound counts on an aircraft.

1. moppitt™ PODS

moppitt™ PODS deliver the same cleaning power as moppitt™ cartridges through a lighter weight and more compact design:

- Contains the same cleaning pads with the same amount of solution as cartridge
- Delivers cleaning pads in innovative thin recyclable cup (Like a Keurig cup) instead of the black hard shell of the cartridge
- Cuts packaging in half from cartridges
- One third lighter than cartridges

2. moppitt™ Hand-Held Accessory

The moppitt™ Hand-Held Accessory provides inflight crew with an innovative new way to clean reachable surfaces without touching the mess

- Hand-Held design is perfect for cleaning reachable surfaces such as tray tables, arm rests, entertainment system buttons, bathroom sinks and counter tops
- POD snaps right into the Hand-Held frame without ever touching the clean pad
- Grey ejection button allows for disposal without ever touching the dirty pad

3. moppitt™ Extenda-Pole

The moppitt™ Extenda-Pole delivers the same cleaning power as the moppitt™ dispenser through a lighter weight and more compact design:

- 50% lighter than the dispenser (only weighs 1 pound!)
- Collapsible design perfect for storage on an aircraft
- Allows for the ejection of dirty pads from the end of the pole without touching
- Single applicator not a multi-cartridge unit like the Dispenser but PODs and cartridges snap easily onto the end of the pole without touching the clean pads

Dakota Supplies Inc. based in Calgary, is a privately-owned corporation specializing in designing innovative products for a variety of industries including commercial transportation, emergency medical services, and home consumers. The moppitt™ family of cleaning products were designed specifically to address occupational health and safety concerns onboard commercial transportation.
