{ #06 - winemaking process }

Made from the main indigenous varieties of the Vinho Verde wine region, this wine is the authentic expression of the region. The night harvest allows the grapes to keep their freshness and aromatic properties. When arriving at the vinification center, the grapes undergo soft pressing at low pressures. The alcoholic fermentation happens in strictly controlled temperatures and the wine is kept in stainless steel vats in contact with lees in order to extract all the flavors and aromas from the variety.

ESTABLISHED 1870

THE TRADITION AT AVELEDA

More than a renowned brand, Aveleda is a family tradition that began in 1870 and that, 5 generations later, stays true to their values and the production of high quality wines. Located in the heart of the Vinho Verde region, and with 35% market share, Aveleda is now the largest Portuguese exporter of Vinho Verde.

VINHO VERDE REGION

A wine that is blended into the soul of this country. An earth calling that saw Camilo Castelo Branco and Eça de Queiroz fall in love with its rivers and mountains to create beautiful pieces of literature. From Minho to Douro, from the Atlantic ocean to the mountain range of Gerês and Marão, this region spreads across 9 different sub-regions that gather the ideal conditions to create a wine region that is completely unique and that wins the hearts of more and more consumers across the world.

AVELEDA FORTE

At Aveleda there's a fountain. It pours a deep freshness, offering the flavor of long summer afternoons, perfumed with soft and vibrant aromas. From here sensations emanate, and discovering them is merely an Aveleda Forte bottle away.

VINTAGE 2019

A dry winter featuring gentle temperatures gave way to a campaign filled with great expectations. The critical flowering period was serene for the most precocious varieties and vines, even if struck by the occasional high precipitation periods where some loss was recorded. The typical summer temperatures happened later than usual, only at the beginning of September, pushing the harvest two to three weeks later than the previous year.
