

## **OYSTER POINT DRAGONS (OPD)**

# **We Care for our Environment!**

**Got plastic water bottles or aluminum cans?**

**Bring them to OPD because ... yes, we care for our environment!**

**Bring them during practice times on Saturday and Sunday mornings, 8:30 - 10:30.**

**In July 2018, OPD's Students Team competed in the Club Crew World Championships in Hungary. Your plastic bottles and aluminum cans helped support this team.**

**OPD is teaching its student-paddlers to care for, and do their share to protect our fragile ecosystem, which is an ongoing investment to ensuring they continue to thrive in a healthy environment now and for years to come.**

**In addition to using non-motorized vessels and equipment for its training, OPD is committed to (1) recycling; (2) picking up foreign objects from our waterways like bottles, plastic bags, nets, strings, ropes, and other items that are harmful to marine wildlife; and (3) participating in California Coastal Clean-ups.**

OPD is a non-profit organization that promotes healthy living through paddling and other initiatives. This community team is open to anyone from age 10 and above. The team consists of a diverse group, from strong athletes to cancer and heart attack survivors. We share a common goal of living a healthier and happier life by staying active through dragon boating and other activities.
