

To LaPorte Vision Center Patients:

Our office is dedicated to serving our community for many years. During this COVID-19 pandemic we strive to provide continuity of care and are continuously assessing our office for ways to protect our patients, staff, and doctors' health. We have decided to make the following changes effective immediately:

- We will close at 5:00pm on Wednesdays.
- For contacts/glasses/supplies pickup – Once you have confirmed your order is ready for pickup, we ask that you call or text when you arrive at our office. A member of our staff will deliver your order to your vehicle.
- For eye supplements and other supplies, we can ship direct to our patients. Contact lens orders can also be shipped to you. Call our office for more information.
- When patients arrive for their scheduled appointment-we ask that you text or call and we will come to your vehicle when we are ready to take you back to the testing area.

We have increased our already strict sterilization practices, and limit patient contact as much as possible. As usual, patients having eye emergencies after hours can call the emergency number listed on our voicemail.

We appreciate your understanding during these difficult times. We are thankful for our wonderful patients and are happy to be here for all of your eye care needs. We look forward to resuming normal business operations as soon as possible.

Sincerely,

La Porte Vision Center Doctors & Staff
