

More information about our vegetable capsules

Empty vegetable capsules (also referred to as empty vegetarian capsules) consist of only two ingredients: HPMC and purified water. HPMC -- Hydroxypropylmethylcellulose -- is derived from vegetable cellulose. 100% natural, these capsules contain no preservatives, gelatin, wheat, animal by-products or starch, and they are made from pure cellulose of either pine or poplar.

Capsules are fast dissolving in the stomach and easily digestible.

Capsules should be stored in a cool (Temperature 58 to 79 degrees F.), dry place (Humidity 45% and 60%). Expiration date of the capsules is five years.

The empty capsules are manufactured in accordance with GMP and ISO 9002 regulations and are made without the addition of ethylene oxide or sulfites.

All capsules are Kosher and Halal certified.

All capsules are GMO free.

All capsules are gluten-free and made without any preservatives.

Gelatin capsules (also known as gel capsules) are made from beef only, no pork. They are BSE (Bovine Spongiform Encephalopathy) free and TSE (Transmissible spongiform Encephalopathies) free.

The vegetable capsules are made in India.

Safety Information: Liquid suspensions with water will dissolve capsules. Some other liquids, such as oils, may or may not dissolve capsules, but may leak where the capsules are joined. Keep capsules out of direct sunlight, hot water and high temperatures. Capsule content depends on the density, concentration and the amount of the powder filled.
