

DECODER DR. "Programmer and Analyzer"

Excellent tool for all DCC users. Plug in a new decoder BEFORE installation and check all of its functions before use. Easily perform programming and decoder read back functions. Program, read back, or test decoders by using a section of track or by plugging a decoder into the 8 pin NMRA socket enclosed on the Decoder DR.

Retail Price: \$95..98 Delivery: October

Item No.: 0001520
