INTRODUCING:

PRICING REVIEW SHEET - ESTIMATING

Don't let your competitors gain the technological edge. Get assistance with the newest construction software in the industry to perform estimates. Produce estimates like never before in a fraction of the time.

What is Pricing Review Sheet - Estimating? Pricing Review Sheet - Estimating is a tool to produce cost estimates. Within your actual plans do take offs and associate material to perform blazing quick estimates. Before you start, determine each material type and associated cost. Now calibrate the Plan to assure the scale is correct. Next make measurements on the plans, associate materials and that it! Your estimate is now complete because the quantity is automatically determined and applied to the Cost you previously entered. Export your results automatically to a report that can be distributed and is linked back to the plan.

The screenshot displays the software interface for pricing review sheet estimating. It features a floor plan with various rooms and annotations. A summary table is visible at the bottom, showing the following data:

Area Sq Ft	Wall Board Ty...	Wall Sub-Total	Start Date	Finish Date	Sub-Contractor	Flooring Sub...	Ceiling - Sub...	Grand Total
1,107	1/2" Board	\$2,214.00	02/12/14	02/18/14	BP09 - Finishes	\$6,136.00	\$6,136.00	\$14,986.00

550.8		\$1,101.60				\$822.00	\$2,740.00	\$4,913.60

On the right side, there is a panel for 'Area Measurement Properties' with various settings like Text Color, Font Style, Responsibility, Ceiling Height, Wall Area Sq Ft, Wall Board Type, Wall Sub-Total, Start Date, Finish Date, Sub-Contractor, Flooring, Ceiling, Door, Window, and Layout dimensions.

Export to summary document automatically.

Multiple take offs can be done with one annotation.

For example, you measure the perimeter of a room. You can set up custom columns to make this one annotation take off the following: flooring, flooring base, sub-base flooring, wall area, ceiling, paint, fixture counts, drywall, framing,

The program automatically calculates cost based on the measurement and material selected.
