Perfect for home wine cellar!

November 3, 2014

We bought this wine cellar cooling unit as a replacement for a different model that we had for about 5 years. So far this is a much better unit. It functions as stated and keeps the temperature and humidity consistent. It was easy to install also. It is a little loud, but we can not hear it outside of the cellar. It doesn't run all the time so the noise really isn't a factor. Overall we are very satisfied with this unit and would definitely recommend it.
