SuperDEXTM

सुपर डेक्स

Glutaraldehyde Solution

Glutaraldehyde is used for cold sterilization of medical and dental equipment. It is used to disinfect equipment's like dialysis instruments, surgical instruments, suction bottles, endoscopes, ENT instruments.

Glutaraldehyde based products are effective sterilisers and disinfectants for medical devices that cannot be steam sterilants, are particularly heat sensitive, for lensed instruments that are commonly subjected to high-level disinfection between patient uses.

Available Composition:

SuperDEX 2.45% : Glutaraldehyde 2.45% w/v

SuperDEX 2.0% : Glutaraldehyde 2.0% w/v

SuperDEX 2.0% and 2.45% (With Liquid Activator) is a high level disinfectant for heat sensitive Instruments and anaesthesia accessories.

Uses:

SuperDEX 2.0% and 2.45% is use for disinfection and Sterilization of:

- Dental and medical equipment
- Heat-sensitive instruments, such as endoscopes, bronchoscopes, and dialysis equipment.
- Endoscopes.
- Instruments that are made of metal, glass, plastics, stainless steel and rubber.
- Disinfection of histology/pathology laboratory table tops.

Directions For Use:

- Activate the Glutaraldehyde solution by adding the entire contents of the Activator Plus activator vial which is attached to the Glutaraldehyde solution container. Shake well.
- Activated solution immediately changes color to bluish-green, thereby indicating solution is ready to use.
- Glutaraldehyde solution is intended for use in the manual (bucket and tray) systems made from polypropylene, ABS, polyethylene, glass-filled polypropylene or specially molded polycarbonate plastics.
- Immersion Time:
Total Disinfection: 10min-15minutes
Total Sterilization: 10 hours

Precautions:

- Protective gloves (butyl rubber, nitrile rubber, polyethylene or double-gloved latex), eye protection, face masks, and liquid-proof gowns should be worn when cleaning and sterilizing/disinfecting soiled devices and equipment.
- Contaminated, reusable devices **MUST BE THOUGHLY CLEANED** prior to disinfection or sterilization, because residual contamination will decrease effectiveness of the germicide.
- The reusable device manufacturer should provide the user with a validated reprocessing procedure for that device using Glutaraldehyde.
- Avoid contamination of food.
- Use in well-ventilated area in closed containers.

Packing Size:

- 5 Litre Jars.

SuperBENZ™

सुपर बेंझ

Benzyl Benzoate Application IP

Uses:

Benzyl benzoate is used to treat lice and scabies infestations. This medicine is believed to be absorbed by the lice and mites and to destroy them by acting on their nervous system.

Direction For Use This Medicine For Lice:

- If your hair has any cream, lotion, ointment, or oil-based product on it, shampoo, rinse, and dry your hair and scalp well before applying benzyl benzoate.
- Apply enough medicine to thoroughly wet the dry hair and scalp or skin.
- Allow the medicine to remain on the affected areas for 24 hours.
- Then, thoroughly wash the affected areas with warm water and soap or regular shampoo.
- Rinse thoroughly and dry with a clean towel.
- After rinsing and drying, use a fine-toothed comb (less than 0.3 mm between the teeth) to remove any remaining nits (eggs) or nit shells from your hair, or, if you have fine hair, you may use a tweezer or your fingernails to pick nits out.

Direction For Use This Medicine For Scabies:

- If your skin has any cream, lotion, ointment, or oil on it, wash, rinse, and dry your skin well before applying benzyl benzoate.
- If you take a bath or shower before using benzyl benzoate, dry the skin well before applying the medicine.
- Allow the medicine to remain on the body for 24 hours.
- Then, thoroughly wash the body with warm water and soap.

Let Alarm Be The Only Thing To
Wake You Up And Nothing Else.

SuperC-OFF™

Cough Formula

सुपर सी ऑफ

Cough Syrup

Diphenhydramine Hydrochloride,
Ammonium Chloride & Sodium Citrate Syrup

Uses

Super C-OFF Syrup is used to treat cough and cold, especially associated with phlegm. It is also used to relieve symptoms like sneezing, a runny nose, watery eyes and a stuffy nose. Take this medicine in the dose and duration as advised by your doctor. Check the label for directions before use. Measure it with a measuring cup and take it by mouth. Shake well before use. Super C-OFF Syrup may be taken with or without food, but it is better to take it at a fixed time.

Medicine Activity

Super C-OFF is a cough reliever made comprised of four different medicines: ammonium chloride, sodium citrate, diphenhydramine, and menthol. Ammonium chloride is an expectorant that acts by reducing the stickiness of airway secretions and assisting in their evacuation. Sodium citrate is a mucolytic, meaning it thins and loosens mucus (phlegm) to make coughing easier. Antiallergic diphenhydramine improves allergy symptoms such as runny nose, watery eyes, and sneezing. Menthol is an organic component that gives off a cooling sensation and soothes minor throat irritation.

Composition:

Each 5 ml Contains:	
Diphenhydramine Hydrochloride IP	12.5 mg
Sodium Citrate IP	50 mg
Ammonium Chloride IP	100 mg
Menthol IP	0.5 mg
Colour: Ponceau 4R	
In Pleasantly Flavoured Mentholated Syrup Base	

Side Effects

The majority of side effects are minor and will go away as your body adjusts to the medicine. If they don't go away or you're concerned about them, see your doctor. Adverse Effects of Biodryl Syrup Stomach pain/epigastric pain, Allergic reaction, Sleepiness, Dizziness, Thickened respiratory tract secretions, Impaired coordination.
