

# PREMIUM, HIGH-FLOW CANAL SCREENS

- PVC circular-honeycomb structure provides the highest open-air ratio, while maintaining superior strength
- PVC support ring for additional strength on all canal screens 4" or larger
- The aluminum rivets will not rust under water
- Threaded fittings on both ends
  - Allows easy canal screen removal for maintenance without the need to cut or glue pipe
  - Canal screens can be combined without any additional parts to suit all applications

## BUILT SMART

Product	Part #	Open Air	Max Flo Rating
3" Canal Screen	CSS3B	36 sq inches	75 Gallons Per Minute
4" Canal Screen	CSS4B	60 sq inches	150 Gallons Per Minute
6" Canal Screen	CSS6B	125 sq inches	400 Gallons Per Minute

All screens have 1/8" round holes, which are small enough to filter out debris that can clog up impellers, yet large enough to allow maximum flow without restriction
