Variable Performance Investment Comparative Chart²

The Comparative Chart below includes performance of investment options that do not have a fixed or stated rate of return. It shows:

- Average Annual total Return³ - Investment option performance over time as compared to an appropriate benchmark⁴ for the same time period,
- Total Annual Operating Expenses -The actual cost to you for investing in a fund is the Net Expense Ratio amount. **The impact of that expense is already included in the Average Annual Total Return displayed.**
- Shareholder type Charges and Investment Restrictions – are investment related fees not reflected in Total Annual Operating Expenses, and fund specific investment restrictions.

Past performance is no guarantee of future results. Your investment in these options could lose money. Current performance may be lower or higher than the performance data quoted. The most recent performance and information about risks is available at www.mykplan.com on the "Investment Performance and Information" page.

² Please note that this chart presents certain information about investments in the Plan. The information may differ in content (for example, the time periods over which performance is calculated) or in format from other material provided to you in written communications, on the Participant Website or in other websites or publications.

³ Average Annual Total Return is a measure of the average return of an investment over some historical period, such as 5 or 10 years. These returns are reported after adjusting for the fund's operating expenses, or Net Expense Ratio, but do not include any sales charges or brokerage commissions incurred in managing the fund.

⁴ In order to evaluate an investment fund's performance, it is sometimes helpful to compare that fund's returns for the same period against the return of the market from which the fund is choosing its investments. Certain independent companies publish Benchmarks, such as the Standard & Poor's 500, which are meant to approximate the return of all of the investments in that market. Each fund compares its returns against the Benchmark they feel most appropriately represents the market in which they are investing that fund's assets.

The **Net Expense Ratio** is the fund's "Total Expense Ratio (Gross)" reduced for any investment management fee waivers that are currently in effect. The **Gross Expense Ratio** is the fund's total expense ratio which is defined as the total cost of investing and administering assets, including management fees, 12b-1 fee (if applicable) in a mutual fund or other collective fund expressed as a percentage of total assets.

The **Per \$1,000 Total Annual Operating Expenses** listed in the table above **is the total annual operating expenses of the investment for a one-year period expressed as a dollar amount for a \$1,000 investment, assuming no returns and based on the stated percentage.**

Fees and expenses are only one of several factors that you should consider when making investment decisions. The cumulative effect of fees and expenses may substantially reduce the growth of your retirement account. For more information about fees and expenses, visit the Department of Labor's web site at http://www.dol.gov/ebsa/publications/401k_employee.html.
