CHOOSING THE RIGHT MAT

There are three types of matting to consider. To select the right type for you, we recommend the following steps:

1. Identify the type of area where you wish to install the carpet, taking into account the amount of traffic it will experience. (ex: heavy traffic vs. light traffic)
2. Refer to the collection of products in the following pages and locate the right fit for you. We've categorized each mat to correspond to one of the four traffic categories, colour coded for your convenience
3. Choose a scraper, a wiper/scraper and a wiper mat. Note: for best results, use three types of mats in the following combination (ex: Upfront Scraper, Super Soaker and Proluxe)

1-SCRAPER

- Exterior usage or between two doors
- Aggressive scraper surface, which will capture the majority of dirt from the soles of shoes
- Does not absorb moisture, which facilitates maintenance

2-WIPER/SCRAPER

- Interior usage or between two doors
- Irregular surface which enables trapping moderate dirt that was not captured at the scraper level
- Moderately retains water and moisture that may later evaporate or be extracted at a later time

3-WIPER

- Interior usage
- Plays a major role in the retention of water and fine dust
- Minimizes the risk of slipping and falling

Light Traffic	Light-Medium Traffic	Medium-Heavy Traffic	Heavy Traffic
			
Less than 125 persons per day	Between 125 and 500 persons per day	Up to 1500 persons per day	Over 1500 persons per day

DID YOU KNOW?

The proper use of entrance mats is recognized by the Green Building Council of Canada, under LEED® certification system (Leadership in Energy and Environmental Design), visioning a transformed built environment leading to a sustainable future. Some Mat Tech products can contribute to obtaining 2 credits:

1 Credit*: "Permanently use the entrance matting system to capture dirt, particles etc. from entering the building at all high volume entrances"

1 Credit**: Use material with recycled content in order that the sum [...] constitutes at least 7.5% of the total value of the material in the project.

ERGONOMIC MATTING

FOR COMFORT & ELEGANCE

FOR DURABILITY & PERFORMANCE

WHY ANTI-FATIGUE?

Flexibility: Allows an effective distribution of weight while reducing fatigue on joints for a more natural positioning and less stress points.

Support: Offers resilience and rebound. While the worker's feet are pushing down into the mat, negative pressure is applied and pushing the feet upward; this energy return stimulates movement and blood flow.

- Relieves muscle stress caused by a state of continuous contraction
- Stimulates blood flow, slowed from compressed blood vessels
- Reduces back stress caused by static movement
- Relieves stress on feet and joints caused by standing up for long periods

24/SEVEN® COMFORTABLE, MODULAR, SIMPLE TO USE

- The 3' x 3' mats interlock on all four sides to cover large areas, or can be used as single stations
- Optional yellow and black borders provide safe access

What is your application? Choose from 5 formulations

General purpose rubber - Natural rubber formulation designed for general application, such as areas with water or debris

CFR rubber - Designed for areas with mineral oil based cutting fluids and solvents

CFR rubber with GritWorks!® - For wet areas that need extra traction

NBR 100% nitrile - Designed for areas with petrochemicals such as hydrocarbons, naphthenes, paraffins and petroleum distillates

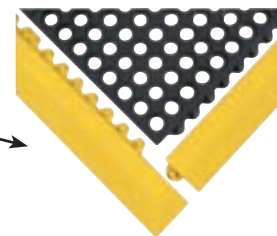

NBR 100% nitrile with GritWorks!® - For wet areas that need extra traction

F.I.T.™ NO. 540 & NO. 541

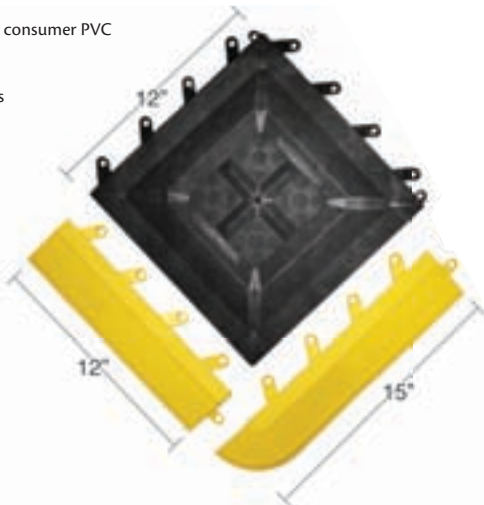

FUNCTIONAL INTERLOCKING TILES FOR INDUSTRIAL & COMMERCIAL AREAS

Innovation made simple: The most versatile, functional and comfortable 12" x 12" modular tile ever created.

- Best interlocking system – angular LockSafe® interlocking system provides a stronger connection, yet the tiles easily "zip" apart for re-positioning
- Exceptional comfort – ergonomic design and PVC formula dramatically reduce fatigue and lead to increased productivity
- Easy ramp system – one ramp fits both "male" and "female" edges
- No-fuss installation – just snap the tiles together and configure to fit your exact work spaces
- Outstanding value for your cost reduction initiatives – save on replacement costs, installation time, and employee lost time
- Thickness: 5/8"
- Green rating: > 40% post consumer PVC

- Unlike other modular ergonomic flooring systems, large installations of F.I.T.™ can be rolled-up for quick cleaning, repositioning or storage
- It's amazing LockSafe® interlocking system works like flexible hinges to hold tiles together even when large connected sections are tightly rolled
- F.I.T.™ is designed for onsite customization - the tiles can be cut every 3" and still connect
- Just cut the tiles and reconnect for a seamless installation
- This unique feature makes F.I.T.™ the most versatile interlocking tile on the market and facilitates total coverage of areas with multiple work centres and equipment with unusual shapes

SOLID – for use in dry areas

OPEN – for use in wet areas
- surface slants toward holes to facilitate drainage

GRADE "A" NO. 482

- Specially formulated anti-bacterial nitrile rubber composite designed to withstand solutions used in a wide variety of food processing environments
- 100% anti-microbial with built-in handles to ease pick-up and cleaning of the mats
- NSF Certified
- Hygienic porthole and solid underside design of the mat simplify cleaning and virtually eliminates areas where food can collect
- Substantial underside knobs allow quick drainage and increase the comfort level of the mat
- Flat, but textured surface increases traction when greasy and wet
- 1/2" thick
- Colour: Terra cotta
- Accepted for use in Canadian food processing facilities
- CFA approved
