

# Tennadyne T-12 LPDA

Purchased new for \$1450 plus hardware package (over \$1500 total investment). Owner had plans to assemble and install it on his 75' tower this summer. However, he became a silent Key before this could happen. The Antenna is still in original box (Box Broken in shipment) with no damage to antenna and never assembled. I have the hardware kits in original shipping boxes and assembly instructions.

Located in Colorado Springs. For more information, please contact me at methods below.

**Asking \$1000**
