

Mission Statement

Restore, protect and preserve Wassermann Lake

We will accomplish our mission through:

- Wise stewardship and conservation practices that restore, protect and preserve water quality and natural ecological balances of the lake
- Building and maintaining on-going relationships with federal, state, county, local government agencies and others related to issues concerning Wassermann Lake
- Developing a lake management plan with specific and comprehensive programs that address and create short, medium and long term projects relating to the protection and quality of the lake
- Acting as an information network to provide and communicate educational resources and information pertaining to the environment and ecology of Wassermann Lake

Vision Statement

Clean water and healthy native plants, fish and wildlife

A healthy aquatic ecosystem that supports balanced, self-sustaining populations of native plants, native fish and wildlife for responsible use by the lakeshore homeowners and the community for future generations.

These Mission and Vision Statements were unanimously approved at the January 15, 2011 Wassermann Lake Association Meeting.
