

In a Nutshell

In a world of multiple aviation advisory services to choose from, you need a trusted and reliable partner that has **your needs** as its top priority. We offer unrivaled, professional and substantive aviation advisory services – always with our primary goal of championing safety and client satisfaction.

Our approach in the provision of our services is governed by our simple vision statement; **“To be Trusted”**.

To achieve such a noble vision, we included the following in our Mission Statement:

- Client care and satisfaction shall always be respected;
- Financial reward shall never be a top key performance indicator;
- Our solutions, communications and interactions with others shall always be honest, verifiable and above all else, champion aviation safety;
- To always provide innovative and dynamic services.

Sample of our Services

Third Party Auditing

Increasingly, companies in need of aviation services require third party audits of providers to ensure Safe, Reliable & Compliant services.

Our expertise, qualifications, experience and audit methodology ensures that an objective and clear result is obtained at reasonable rates.

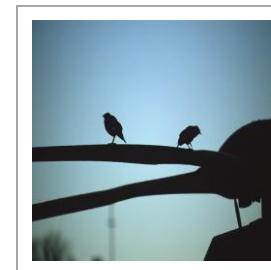

Safety and Quality Services

Apart from Quality Management Services, we also provide advice and development of Safety Management Systems.

These include drafting safety documentation, risk management services, safety culture assessment, investigations and training to those who manage the SMS.

Miscellaneous

- UAS/ RPAS (Drone) Advisory Services;
- Presentations and Public Speaking;
- Research and Development;
- In-house training interventions;
- Aviation Documentation;
- Aviation Tender/Pre-Tender Processes;
- Gap Analysis/Desktop Reviews.

Our Approach

What differentiates us from our competition is our absolute passion for our chosen field of expertise. This culminates in exceptional client service and satisfaction while also ensuring quality in our work.

To earn our Client's trust is worth more to us than their money. Our strength lies in our ability to add value. Our dedication to our customers and to aviation safety is absolute and lasting.

Aviation is a high risk environment with very little tolerance for mistakes. That is why we do everything 100%; anything less might cause harm to humans, stoppages, legal actions or reputational damage.

*Aviation Safety is a **state of mind**, not only a set of manuals, procedures and actions*

Qualifications, Experience and Skills

It is important that you trust our abilities when you consider our involvement. Here, we provide you with a few of our qualifications and experiences to help guide you in your deliberations:

- MSc Aviation Management (*Cum Laude*);
- Flight Safety Foundation BARS Lead Auditor;
- CAA Flight Operations Inspector/Enforcement Officer;
- ISO 9001 Lead Auditor;
- ATPL pilot's license holder;
- Military, Law Enforcement and Commercial Aviation Experience;
- Authors of multiple Aviation Manuals, Whitepapers, Research Works.

Why use 22° South?

Our Values

Some might describe our methods as 'Traditional' because we take time to answer each email; punctually and respectfully. Or when it concerns advice offered, such advice is firstly properly researched before sharing.

Trust and respect is earned, never given away.

As a result of our passion to contribute to the Aviation Community as a whole, we automatically serve our Clients with unmatched dedication and loyalty. Any Client dissatisfaction is treated as the exception and dealt with sincerely through honest self-assessment that leads to re-inventing ourselves continuously.

Walk with us and discover what true Customer Satisfaction in this Industry is all about.

Experiences

We've worked hard to gain the respect of our peers in industry and also, our Clients. Here are some examples of activities and related experiences.

- Presenters/Facilitators at International Safety and Quality Summits;
- Invited by ICAO to deliver presentations;
- Keynote Speaker at Internationally Recognized Aviation Software Manufacturer/Distributor's Annual User Conference ;
- Approached by large companies in the Oil and Gas sector to design unique Aviation Management Systems;
- Requested by multiple Aviation Companies to deliver in-house training;
- Innovative in including Human Factors in Aviation Manuals;
- First to author a Commercial Drone Operations Manual and Safety Case in South Africa.

Some of our Work

Remote Oversight

Regulators, clients and insurance companies require aviation operators to demonstrate proper remote oversight and control of their activities. This is especially true of operators that facilitate commercial contracts in other states.

To this end, we have developed remote base oversight systems in, amongst other locations, Afghanistan in the midst of a war. These solutions can only be derived through understanding and knowledge and was delivered complete with documentation, training and implementation assistance.

“They are willing to share their wealth of knowledge and apply it to our specific operation” — M. McConnell, Safety Manager/ATPL/DFE, HALO Aviation

Our Strength

Our strengths does not lie in size, conventional approaches or mainstream dogma. It lies in our brutal honesty and passion to truly help others reach a level of fundamental understanding of aviation safety.

Additionally, we pride ourselves on our independence which provides our clients with peace of mind that services delivered are not tainted by any outside influences, but are instead truthful and accurate.

Research

To provide proper and lasting solutions in the Aviation industry, the ability to conduct and utilize thorough research is critical.

On occasion, we have been requested to determine the accident causation factors of scheduled services in certain geographical areas, design a new helicopter offshore tender evaluation system and research and develop a commercial unmanned operation application, inclusive of documentation and safety case for our clients (in the absence of Regulations).

These projects demanded proper research skills and we are proud to have successfully provided these clients with accurate, useable and actionable information to be able to make the right (educated) decisions and reach their goals.

While research can be timeous and expensive, we feel that the considered outcomes that follow as a result adds enormous value to the process.

Our Goal

Provision of Aviation Advice that is:

Photo: UK Coast Guard AW 139, Ned Dawson

- Honest;
- Independent;
- Passionate;
- Professional; and
- Affordable.

“If we can help one person understand, fully, aviation safety, we would have succeeded.”
