

Sue Kerr: I studied at Art Center College of Design, graduated from Salem State University with a major in 3D design.

I have lived in Bradenton for the past 9 years.

I've always needed to make things -whatever the medium. The first time I touched clay, I knew it was for me, it just felt right. With clay, there is always something new to learn. I enjoy each step from conception to completion, I strive for simple, lighthearted, and whimsical designs. If the viewer sees something else, I'm delighted.
