

Physical Therapy *Occupational Therapy* *Speech-Language Pathology*

Unified Therapy Services

Our team works with a variety of diagnoses from developmental delay to serious neurological disorders. A physical therapist can work on motor skills used in play, walking & balance, while occupational therapists work on completing daily living activities such as: dressing, writing, toileting, and sensory integrative dysfunction. Speech therapists can address a wide range of goals which target articulation, social interaction, and expressive and receptive language skills.

Free Screenings

We provide free screenings, pre-authorizations, and insurance verifications for all of our patients. This begins with a phone call from the patient or parent/caregiver inquiring about our services. Our receptionist will complete a referral intake form, which includes demographic and insurance information.

Plus Much More!

Sensory Integration & Praxis Tests • Augmentative Communication • Yoga Treatment Techniques • Autism Certified Therapists • Therapeutic Listening • Social Skills Groups • Aphasia Groups • Interactive Metronome • Kinesio Taping • Therapressure/Brushing • Handwriting Without Tears®

“Together We Can Make A Difference”

About Us

Unified Therapy Services is a pediatric focused outpatient clinic offering physical, occupational and speech therapy services. We embarked on our journey in hopes of providing the highest quality of professional health care services to our patients, their families, and the communities in which we do business.

Within our 8,800 square foot facility we address each patient's individual deficits and delays with nine private treatment rooms, a large gym, and a simulated apartment. We have an abundance of swings, pediatric equipment, and unique lighting designed for children with special needs.
