

VENTEGRA[®]

THE NEXT GENERATION SOLUTION

The new business prescription for better pharmaceutical services

Best Practices[™]
Certified

DS Medical Holdings

Ventegra is a new channel for pharmacy benefit administration that reduces costs, increases efficiencies and enhances care.

We offer a flexible choice of services to meet your unique needs:

- **Pharmaceutical Rebates and Discounts:** Receive complete pass-through of savings on a wide selection of drugs, including brand prescriptions, high-cost injectables, popular over-the-counter products, diabetic supplies and blood products.
- **A single Maximum Allowable Cost (MAC) list for reimbursing retail pharmacies:** We do not use differential or fictitious MAC lists to generate hidden margins. A single MAC list ensures that what is paid to the pharmacy for a prescription is the same as what is billed to the employer or payor.
- **Acquisition Cost Mail and Specialty Services:** Eliminate hidden mark-ups and fees by receiving true net cost on brand and generic drugs through our mail and specialty pharmacy network.
- **Prescription Savings Program:** Provide your employees or members with a turn-key prescription savings program at our nationwide network of retail pharmacies.
- **Clinical Programs and Support:** Enhance quality of care with our suite of clinical services, including Medication Therapy Management, Pharmacy & Therapeutics review, custom formulary and benefit design, and more.
- **Integrated Claims Processing & 340B Compliance:** Ensure complete claims capture and reporting for pharmacy and medical claims with our Ventegra Claims Integration System, and guarantee 340B compliance with our automated 340B system.
