Subject: Council meeting on Dec 3, concern about creeks
Date: Thursday, November 21, 2019 2:58:52 PM

Please forward to council members:

Dear members, as a concerned citizen, I wish to express my opinion regarding zoning and setbacks for creeks/ waterways. I want to see **strong protections for these resources by enforcing the required setbacks, where feasible.** Please include language that clearly states the steps for determining if the required setback from creeks and riparian habitat may be reduced upon an applicant's request. This provision should apply to any request to modify City zoning or policy requirements.

Thank you.
