Part - 2

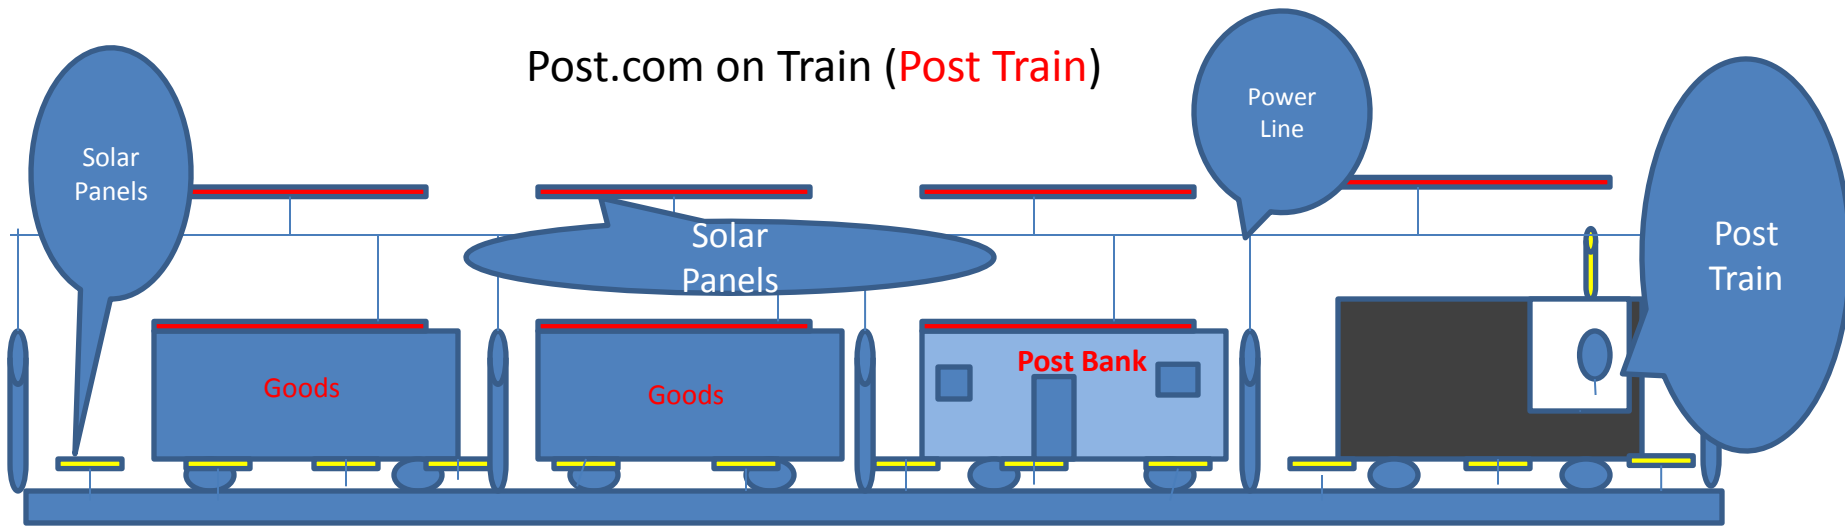

Use Rail with Solar Power and connect to needy to help bridge and improve the ECONOMY

Solar Powered Good Trains – Way forward for Railways

- Separate line to be created for Goods Train, this will help increase capital flow and help in increasing GDP
- Good Train line to be powered with Solar Panels and mixed along with Electricity to help make it Hybrid Lines, this will help reduce the carbon emission, reduce usage of fossil fuel and also help boost economy by increase in GDP
- All goods container to be carrying /top be panned with solar cells
- Track sides to be laid with Solar Panels to supply to Power
- Solar Panels to be laid all along the side of track to generate additional electricity
- All the solar panel to be connected to main line to help support power supply, this to be used to fuel power to Train, thereby reduce the cost of transport

Post.com on Train (Post Train)

Goal – Bridge Railway and Post Network (DOT/Post Office and Post Bank) to help improve the Citizens who are in Rural and Far off Place, help all to get to main stream. This will help improve connect along with help improve wealth at common man end and Economic Development (GDP)

- New Train to be started with Post Bank and Post Office on the train, the train to move between 2 specific locations, mainly to connect
- The Post Bank will be extension of X Branch and will be equipped with Net and PC facility, connected real time to Base Branch/Central System. An separate App to be created to manage customer transactions/Goods management
- The train to have GPS to help customers/users to help locate phone and also transaction using the app
- Train to start Station X to Station Y and then return back to station X
- Train to be powered with Solar Panels and mixed along with Electricity to help make it Hybrid, this will help manage power and help improve power consumption
- Train to be equipped with Goods wagon which will contain goods of produced by Farmers and SME, which will be used to be sold on the way or moved to other locations using Postal and Rail Network, this to be managed under a separate wing of Post Office and Rail to help connect and build the Villages to rest of the World
- Post Train to be connected across to create a Post Train network to help goods movement
