

MaxPour®

AMERICA'S VERSATILE PLAY SURFACE

MaxPour® playground surfacing is a poured-in-place playground system built around a standard 1/2" thick top layer. We use the finest quality Rosehill TPV granules in a 1-4 mm size for our top layers, bound by MaxPour® aromatic binder.

Versions using MaxPour® aliphatic binder are possible at extra cost.

Specifier's Note:

Standard (aromatic) binders can impart a slight "ambering" effect to colors, therefore aliphatic binders are suggested for systems using pastel or lighter colors which can be affected.

Aliphatic binders have a crystal-clear consistency, but must be specified, as the industry standard is to use aromatics, and systems are priced using aromatics unless otherwise requested.

With 24 standard TPV colors available, you really get your money's worth with MaxPour®.

24 Exciting Rosehill TPV Colors

							
Standard Red RH01	Bright Red RH02	Standard Green RH10	Bright Green RH11	Dark Green RH12	Standard Blue RH20	Purple RH21	Sky Blue RH22
