Post Caps and Lighting

Wireless Solar Post Cap Installation Guide

Step 1
Ensure post cap light is oriented correctly in the upright position with the solar collector exposed to light.

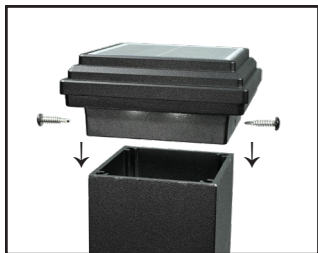

Step 2
While holding the post cap upright, turn on the LED lights via the push switch inside the bottom of the post cap.

Step 3
Test the lights by covering the solar collector to ensure lights function correctly and turn on when not exposed to light.

Step 4
Set post cap down onto the post and attach to post using 2 ea. self-drilling screws provided.
