

Dear FXAM family members,

We are excited to announce that the University of Michigan has received IRB approval to participate in the Neuren NNZ-2566 drug trial! We would like to begin with pre-screening phone interviews as soon as possible. Please see the attached documents for detailed information on this drug trial which is for males with Fragile X Syndrome who are between 12-45 years old.

Families who are interested in having their sons participate in the study should call my direct office line: 734-615-3591. I will be scheduling 15-20 minute pre-screening phone interviews based on my schedule and the family's schedule. If I am not available when you call, please leave me a voicemail message containing the following:

1. Parent's name (please state clearly)
2. Your son's (or sons') name(s) (please state clearly AND spell) and date(s) of birth.
3. Clearly state the best number for me to call back at (leaving a secondary number if possible would be helpful too) and when would be a good time for me to return your call.

If you have any questions, please let me know. Thank you!

Kailey Owens, MS, CGC
