

Frame 6B Parts John Brown (General Electric) PG6541 Gas turbine Parts

Serial: 295510, KW: 39,950

History:

Parts replaced as new in 2000/2001 have about 20,000 hours/<900 starts since 2005 shutdown.

1 - John Brown (General Electric) Load gear , Drawing number: E4807, serial number: J3598, wheel assembly no: C2303G001 Rev A, Pinion assembly no: 4041GG3 G001 rev 1, 60 hz, Inside has new Philadelphia gears replaced 2007 (numbers from gears 242864-02 S/N 001 55370-0183 9112100)

1 – Accessory gear coupling / starting turbine coupling Rex Chainbelt serial number: 894003-00 , Ge part number: 307A9204 with connected parts, Type DBZ

**1 - Liquid fuel flow divider Roper serial no: G97442, drawing X20091-7,
ref no: 307A9396P001**

**1 - Number #1 Compressor [bearing assembly](#) part number: 188C9724G001 drawing number
E10428G011, oil deflector part number:154D7145G001**

1 – Turbine Thrust bearing

2nd stage heat shields (complete set of 8 pieces) 188C9473 G004

1 Coupling , solid-output (Gas turbine and load gear) Total length 76 1/2", Flange diameter 17 3/4" , 24 Bolt holes
