Innovative solutions for the workplace

Well-being

Alera makes it easy to bring a more active workstyle to the office with a wide range of sit-to-stand workstations, height-adjustable tables and perch stools.

Open Plan

Keep team interaction high and aesthetics clean and modern. With Alera's modular components you can rearrange your space as your needs change.

Selection

With over 600 products to choose from, Alera has the perfect solution for the way you work. And, we're constantly enhancing our designs to meet the needs of the ever-changing workplace.

- Bookcases • Breakroom Cabinets
- Desks • Files • Seating
- Sit-to-Stand • Tables • Wire Shelving

Flexibility

Look to Alera for pieces that easily adapt to your work style and environment. Tables that reconfigure for conferencing and training. Breakrooms that double as collaborative spaces.

Versatility and Value by Design

ICON INDEX

Indicates a product that must be shipped freight.

Indicates a product that requires assembly.

Identifies items added since the last edition of this catalog.

Indicates the maximum weight a chair can support.

Products made with at least 10% total recycled content.

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the green leaf symbol to highlight products that have one or more of the following attributes: reduced VOCs, compostable, biodegradable, contains recycled content, or other environmental attributes that make this product[†] less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the green leaf symbol have been endorsed by third-party certifying organizations, and where applicable, the certifying body's logo appears next to the product's name. Please note that we have not independently verified the environmental attributes.

[†]These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

THIRD-PARTY CERTIFICATIONS GUIDE

ANSI/BIFMA Certification Identifies products that meet or exceed ANSI/BIFMA standards for safety and durability.

ANSI/BIFMA certified furniture meets high standards for indoor air quality as well as safety and ergonomics in order to minimize health hazards and make injury less likely. Specific performance tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These tests determine the stamina of casegoods and seating in their day-to-day use on a single work shift over ten years under both normal-use and excessive-use conditions.

CARB Compliant In January 2009, the California Air Resources Board (CARB), a department of the California Environmental Protection Agency,

implemented limits for formaldehyde emitted from composite wood panels. The California regulation governs the formaldehyde in both raw composite wood panels and finished products sold or used in California. Both imported and domestic products are regulated and must be third-party certified and clearly labeled to indicate they meet California's requirements.

ETL Listed The ETL Listed Mark (Electrical Testing Lab) is proof of product compliance (electrical, gas and oil-fired) to North American safety standards. Products that bear the ETL Listed Mark have met the minimum

requirements of widely accepted product safety standards as determined through the independent testing of Intertek, a Nationally Recognized Testing Laboratory (NRTL).

GREENGUARD® Indoor Air Quality Certified

Identifies goods with low chemical and particle emissions for use indoors, primarily building materials, interior furnishings, furniture, cleaning and maintenance products, electronic equipment and personal care products. The GREENGUARD® Environmental Institute governs the integrity of the certification process.

NSF Certification Identifies products certified as safe for food preparation, consumption and storage by NSF International.

SCS Indoor Advantage Gold™ Certified additional conformance with California 01350 Special Environmental Requirements and Collaborative for High Performance Schools (CHPS). In order for a product to qualify for the Indoor Advantage Gold certification, modeled concentrations for individual VOCs (volatile organic compounds) in classrooms and offices must not exceed one-half of the defined CREL (chronic reference exposure levels) threshold. CRELs have been developed for 80 chemical substances. Given that other (uncertified) products and materials in the building may be sources of the same chemicals, the conservative standard set for Indoor Advantage Gold certification is intended to ensure that individual occupants' overall exposure to any one of these chemicals does not exceed the CREL.

UL Listed Indicates that a product has been tested and certified as safe by Underwriters Laboratories Inc., an independent nonprofit organization that has developed more than 800 standards for safety. UL's web site is at <http://www.ul.com>. Information about UL standards can be found at ul.com/global/eng/pages/solutions/standards/

Office Suites

Create a space for the way you work.

A productive, personalized space is essential, even in this increasingly mobile world. We have the perfect pieces to shape your home base, whether you're looking for a full office suite or a sleek table desk, open plan design or private office. From traditional to contemporary, richly detailed to fresh, clean lines, our selection lets you put together an office that works for you.

Laminate Office Suites 6-13

Steel Office Suites 14

Computer Furniture Sit To Stand

A ADAPTIVERGO™ SIT-STAND LIFTING WORKSTATION

These lifting workstations turn any desk into an ergonomic sit-stand station. Raise and lower with ease within a 14" range by simply pressing the levers on each side to engage. Two-tiered worksurface and keyboard/mouse platform for better ergonomics. Platform's rear-notched design accommodates most monitor arms and for cable management. Designed specifically for use with the Alera® Monitor Arms. Smart space-saving design stays within your desk space and raises vertically within the same plane. No having to step back and out when in the raised position. Reinforced base for stability at any height. Will not flip or height-drop even when leaning on the workstation. Manufacturer's limited five-year warranty. Meets or exceeds ANSI/BIFMA Standards. 

B ADAPTIVERGO™ SIT STAND WORKSTATION

Allows users to stay active while staying productive. Height adjustment is quick and effortless with the help of a heavy-duty gas-assist cylinder with adjustable tension and infinite positive stop. The beveled, seamless worksurface supports up to two 24" monitors while still providing room for other work materials. This model provides 16" of height adjustment and can mount on most worksurfaces 20" - 30" deep. Pair with the Alera® monitor arms for additional functionality. Manufacturer's limited five-year warranty. Meets or exceeds ISTA Standards.

A ALERA® ANTI-FATIGUE MAT

Encourages proper ergonomics and reduces fatigue with this cushioned standing mat. Beveled edge lays flat on the floor to reduce trip hazards. Rubber and vinyl construction ensures long lasting resiliency and cushioning. Ideal for use at sit-to-stand workstations, service counters, breakrooms, or wherever standing is required. Easy to clean surface with molded grid pattern to catch dirt and spills. Combine with Alera® Height Adjustable Tables or Alera® Lifting desks for even more ergonomic benefits with your sit-to-stand workstations. Manufacturer's limited five-year warranty.

E ADAPTIVERGO™ CLAMP-ON KEYBOARD TRAY

Smooth movement slide-out tray puts your keyboard right where you need it under your desk for improved ergonomics. Easy to install with sturdy metal clamps on any surface up to 1.5" thick. No screw installation—does not damage the worksurface. Impact resistant plastic tray fits most standard and ergonomic keyboards. A great choice when under-desk crossbars, hardware or other obstructions make permanent mount keyboard trays impossible to install. Manufacturer's limited five-year warranty.

ID No.	Color	Glide Track Length	Keyboard Tray Size	Unit	Price

Chair Features Buying Guide

Find the functions you're looking for using the following icons shown throughout the seating section.

Pneumatic Seat Height Adjustment

Regulates seat height relative to the floor so that feet are flat on the floor—supports better circulation.

Back Height Adjustment

Positions height of lumbar support relative to the seat cushion to alleviate back stress.

Seat Glide Mechanism

Seat or back moves forward or back, then locks in position to create the proper seat depth for better back support and circulation to legs.

Tilt Tension/Tilt Lock

Tilt allows back to recline at a 1:1 ratio to seat for a comfortable reclining position and redistribution of pressure points. Tilt tension controls the rate and ease at which the chair reclines and the lock-out tilt function keeps chair in upright position.

Knee Tilt

Pivot point located below front half of seat. Allows user to keep feet flat on floor while reclining. Offers increased circulation and redistribution of pressure points.

Synchronized Knee Tilt

Combines, at a 2:1 ratio, the smooth recline of the back with the limited front rise of the seat to keep feet on the floor and improve circulation to legs.

Dual-Action Tilt

Back reclines at a 2:1 ratio to seat angle creating relaxed positions while keeping feet relatively flat on the floor.

Posture Lock

Holds back in place in an infinite number of positions within a fixed range to offer variety in spinal alignment and weight distribution.

Multi-Task Control

Single lever easily adjusts seat and back angles independently, providing an infinite number of locking positions within a fixed range for customized comfort.

Asynchronous Control

Three levers modify: angle of back relative to seat; tilt (free float or locking); and forward tilt. Offers a wide variety of movement, spinal alignment and weight distribution.

Dual-Clutch Posture Control

Seat and back angles adjust independently and lock in infinite positions within a fixed range – ideal for quick adaptation to different activities and multiple users.

Variable Synchro-Tilt

Back reclines in a 2:1 ratio to seat angle. Chair tilts freely, locks in five positions, or tilts forward to alleviate pressure points.

Integral Lumbar Support

Lumbar support within the chair back is height adjustable for proper placement; alleviates back stress.

Buying Guide Chair Mats

1. Determine flooring type—carpet or hard floor

2. Determine use—consider factors for frequency of use, weight placed on mat and type of flooring

For Carpet				For Hard Floor
ALL DAY USE	FREQUENT USE	MODERATE USE	OCCASIONAL USE	ALL DAY USE
ALL DAY	6-8 Hrs.	4-6 Hrs.	0-4 Hrs.	ALL DAY
HEAVY	AVERAGE	AVERAGE	LIGHT	AVERAGE
HIGH PILE	MEDIUM PILE	LOW PILE	FLAT PILE	HARD FLOOR

3. Determine your carpet thickness

- Open one end of a paper clip.
- Insert paper clip into carpet and pad, pushing down to the sub-floor.
- Measure the portion of the paper clip that entered the carpet and pad, and then reference the guide below.

HIGH PILE

MEDIUM PILE

LOW PILE

FLAT PILE

HARD FLOOR

4. Measure your floor area to determine size and shape

Lip

Square

Rectangle

Work-Station

A STUDDED CHAIR MAT FOR LOW PILE CARPET

Studded design secures mat from moving while protecting carpet from caster wear, spills and heavy traffic. Medium weight chair mat for frequent use on carpets up to $\frac{1}{2}$ " thick. Smooth beveled edge for easy carpet to mat transition. Non-orthophthalate, non-cadmium formula promotes a healthy work environment while offering exceptional clarity and durability. Manufacturer's limited lifetime product replacement warranty. GREENGUARD Gold Certified.

ID No.	Surface	Style	Overall (W x L)	Lip (W x L)	Unit	Price
1 ALE-MAT3648CLPL	Low Pile	Lip	36" x 48"	19" x 10"	Each	59.99

A SOFT CUSHIONED ANTI-FATIGUE ERGONOMIC FOOTREST

Provides precise ergonomic foot support for any user. Comfortable cushioned footrest helps reduce strain on the feet. Non-slip, anti-fatigue cushioned mat. Clever foot adjustable tilt mechanism. Two tilt positions at 20 and 40 degrees as well as two height-adjustable positions. Non-slip, non-scratching floor pads keep your footrest in place on the floor. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Unit	Price
1 ALE-FS112	14" × 19½" × 3¾" to 7½"	Black	Each	59.00

B RELAXING ADJUSTABLE FOOTREST

Provides precise ergonomic foot support for any user. Designed with roller surface bumps to both help massage tired feet and keep your foot from slipping. Three tilt positions from 20 to 70 degrees and three height-adjustable positions. Non-slip, non-scratching floor pads keep your footrest in place on the floor. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Unit	Price
2 ALE-FS212	13¾" × 17¾" × 4½" to 6¾"	Black	Each	99.00

C ERGO TILT FOOTREST

Tilting footrest for proper ergonomic alignment. Clever foot adjustable tilt mechanism rolls back and forth for your ideal angle from 0 to 20 degrees. Ribbed surface prevents feet from slipping. Non-slip, non-scratching floor pads keep your footrest in place on the floor. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Unit	Price
3 ALE-FS312	13¾" × 17¾" × 3¾" to 5¾"	Black	Each	29.00

D ACTIVE PNEUMATIC FOOTREST

Foot activated height adjustment allows one touch adjustment of footrest height or angle or both. Ideal for office, home office, commercial and industrial applications for use with chairs or stools. Centrally positioned lift activation button allows to effortlessly position the platform height at any setting. Innovatively designed pivoting feature tilts the platform to different angles. Texturized rubber surface is slip resistant. Meets or Exceeds ANSI/BIFMA Standards. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Unit	Price
4 AAP-AL382	20" × 14½" × 4½" to 17¼"	Black	Each	399.99

E LUMBAR BACKREST

Convenient memory foam lumbar cushion provides support for the lower back. Mesh fabric upholstery is both cooling and long-lasting. Adjustable elastic strap secures the backrest just where you want it. Great with office chairs, car seats, or in the home. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Qty.	Unit	Price
5 ALE-BR317 *	14¾" × 4¾" × 6¼"	Black	1	Each	35.00

* Contains 5% post-consumer recycled content, 10% total recycled content.

Unique material rebounds at pressure points to fully support back and waist

F MESH BACKREST

Ergonomically designed stretched mesh backrest supports the lower back. Contoured shape and curves to keep the back in alignment. Breathable mesh fabric keeps the back cool and supported. Adjustable elastic strap secures backrest in place. Great with office chairs, car seats, or in the home. Manufacturer's limited five-year warranty.

ID No.	W × D × H	Color	Qty.	Unit	Price
6 ALE-BR118	18¾" × 15¾" × 5¾"	Black	1	Each	29.00

G - I COOLING GEL MEMORY FOAM BACKREST AND SEAT CUSHION

Soft, resilient memory foam cushion is pressure sensitive to help relieve stress points. Smart gel-cooling layer helps provides longer lasting cooling by dissipating heat. Long-lasting, fade-resistant fabric cover. Washable. Manufacturer's limited five-year warranty.

G BACKREST

Two adjustable straps to keep your backrest in place at the optimal lumbar position.

ID No.	W × D × H	Color	Qty.	Unit	Price
7 ALE-CGC411	14½" × 14½" × 2¾"	Black	1	Each	54.00

H SEAT CUSHION

Non-slip undercushion cover keeps the cushion firmly in place on your chair.

ID No.	W × D × H	Color	Qty.	Unit	Price
8 ALE-CGC511	16½" × 15¾" × 2¾"	Black	1	Each	59.00

I DELUXE BACK SUPPORT

Contoured back support for optimal spinal alignment. Curved polyurethane foam adjusts to your lower back with a convex spinal pressure point. Adjustable straps easily mount to any chair. Removable cover is machine washable. Manufacturer's limited five year warranty.

ID No.	W × D × H	Color	Qty.	Unit	Price
9 ALE-BR210	15½" × 3" × 11"	Black	1	Each	45.00

Files

Conquer paperwork pileup with easy-access organization.

Organization is everything when it comes to streamlining your office and workflow. And despite all of the new technology, paper management is still one of the biggest challenges in every office. Tame the paper tiger with efficient filing that makes the most of your space. From practical backroom archives to sleek dual-purpose file/seating, we have what it takes to put paper in its place.

Tables

Transform any area into a flexible gathering space.

One of the most versatile pieces, a table can turn a corner into a flexible gathering space, an empty room into a training center, a café into a collaboration zone. Adaptable designs that roll, fold or adjust up and down take flexibility to the next level so you can rearrange, customize and store tables away. Welcome to the endless possibilities our wide selection of tables brings.

Smart designs, **smart prices!**

Alera office furniture is an impressive combination of innovative styling, high quality and affordability. With hundreds of choices in office suites, seating, tables, storage and more, Alera always delivers the perfect solution that works for you, your space and your bottom line.

The following tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These performance tests determine the stamina of casegoods and seating in their day-to-day use on a single work shift over ten years. Concentrated load tests represent normal use conditions. Distributed loads represent excessive use conditions. All of our manufacturers recognize the value of building product to ANSI/BIFMA standards while only some manufacturers go to the added expense of having their products certified. Look for the ANSI/BIFMA symbol in this catalog to identify products that meet or exceed the ANSI/BIFMA standards.

Casegood Testing Standards

Durability Test

Drop Test

Each end is picked up and dropped to evaluate how well desk withstands impact on legs or base.

Top Load Tests

Concentrated Load Test

200 lbs. applied through 12" diameter at weakest point to ensure that no structural damage occurs from concentrated loads.

Distributed Load Test

1.5 lbs. per inch of perimeter applied to ensure that no personal injury results from distributed loads.

Ease Load Test

200-lb. bag lifted and dropped 10,000 times to test durability of desktop to endure cyclic loading.

Drawer Tests

Cycle Test

Drawer is filled with .017-lb./cubic inch of volume and cycled 50,000 times to test support of common loads under normal operating conditions.

Outstop Test

Weighted load pulls drawer completely open 15,000 times to evaluate the effectiveness of outstops.

Pull Test

Measure of force needed to pull drawer open when filled with .017-lb./cubic inch of volume.

Rebound Test

Drawer is loaded, opened and forced closed 5 times to ensure drawer won't rebound over 1 1/2".

Retention Test

Unloaded open drawer has an outward force applied to ensure drawer won't accidentally disengage.

Other Tests

Adjustable Keyboard Surface Load Test

Tests keyboard drawer durability through 2,500 horizontal, 2,500 vertical and 2,500 swivel adjustments with a 10-lb. concentrated load.

Leg Strength Test

100 lbs. of concentrated force inward and 50 lbs. of concentrated force outward on legs to test stability and support.

Lock Strength Test

50 lbs. of outward force applied to evaluate strength of locking mechanism.

Stability Test

Largest drawer in each pedestal is opened and loaded to ensure desk won't tip when full.

Seating Testing Standards

Back Strength Tests

Swivel/Tilt Test

200 lbs. of concentrated force applied; 300 lbs. of distributed force applied.

Task/Guest Test

150 lbs. of concentrated force applied; 250 lbs. of distributed force applied.

Back Durability Tests

Swivel/Tilt Test

Chair is fully reclined 120,000 times by 225 lbs. of force with a 225-lb. load on seat.

Task/Guest Test

Chair is tilted 120,000 times by 75 lbs. of force with a 225-lb. load on seat.

Drop Weight Tests

Seating Impact Tests

125-lb. weight dropped onto seat 100,000 times.

6" Drop Test

A 225-lb. concentrated load dropped 6" onto seat then a 300-lb. distributed load dropped 6" onto seat.

Base Tests

Base Tests

2,500 lbs. of concentrated force applied on base then 2,500 lbs. of distributed force applied on base for one minute each load.

Stability Tests

Front Stability Tests

135 lbs. centered 2.4" from front edge of seat. Chair must be able to take 4.5 lbs. of horizontal force without tipping over.

Back Stability Tests

No less than 20 lbs. of pressure should be required to tip the chair back with 173 lbs. on seat.

Caster Tests

Caster Durability Test

Rolled along a 30" distance 100,000 times with a 250-lb. load.

Armrest Strength Tests

Outward Force Arm Test

A load force is applied outward on the arm; then 150 lbs. of distributed force is applied.

Downward Force Arm Test

A load force is pulled downward on the arm; then 300 lbs. of distributed force is applied.

Footring Tests

Footring Durability Test

200 lbs. of weight applied along a 4" length of footring 50,000 times.

Swivel Tests

Swivel Cycle Test

Base is rotated 120,000 times with 225 lbs. on seat.

Third-Party Certifications Guide

ANSI/BIFMA Certification ANSI/BIFMA certified furniture meets high standards for indoor air quality as well as safety and ergonomics in order to minimize health hazards and make injury less likely. Specific performance tests were developed by the Business and Institutional Furniture Manufacturer's Association (BIFMA) and approved by the American National Standards Institute (ANSI). These tests determine the stamina of casegoods and seating in their day-to-day use on a single work shift over ten years under both normal-use and excessive-use conditions.

the BIFMA sustainability standard

BIFMA level™ Sustainability Certification level™ is the multi-attribute sustainability standard and third-party certification program for furniture products in the built environment. Furniture is evaluated for sustainability across four elements: a company's social actions, energy usage, material selection and human and ecosystem health impacts. The level™ brand identifies that a product has been examined and evaluated by an independent third-party certifier, and has earned a numeric marking of 1, 2, or 3 which indicates what threshold of certification it has achieved.

level™ "requirements" A product must first meet six mandatory prerequisites across the four elements and then accumulate points within each element, including product-related points, to determine its level. For more information, go to: www.levelcertified.org

To achieve level™ 1:

- conform with all six prerequisites
- accumulate between 32 and 44 total points; at least 5 of the total points must be "product" related points for level™ 1 certification

To achieve level™ 2:

- conform with all six prerequisites
- accumulate between 45 and 62 total points; at least 11 of the total points must be "product" related points for level™ 2 certification

achieve level™ 3:

- conform with all six prerequisites
- accumulate between 63 and 90 total points; at least 18 of these total points must be "product" related points for level™ 3 certification

California Flammability Standards Bulletin CA 116 Specifies requirements, test procedure and apparatus for testing the flame retardance of upholstered furniture. Measures the cigarette ignition resistance of an actual item of upholstered furniture.

Bulletin CA 117 Specifies requirements, test procedures and apparatus for testing the flame retardance of resilient filling materials used in upholstered furniture. Measures flammability using both open flame and lighted cigarettes as the ignition sources. All upholstery components are tested.

Bulletin CA 133 Specifies the flammability test procedure for seating furniture used in public occupancies such as jails, prisons, nursing homes, healthcare facilities, public auditoriums and hotels. It tests completed items of upholstered furniture and measures the type of ignition that may be typical of arson or incendiary fires or common accidental fires in public buildings.

CARB Compliant In January 2009, the California Air Resources Board (CARB), a department of the California Environmental Protection Agency, implemented limits for formaldehyde emitted from composite wood panels. The California regulation governs the formaldehyde in both raw composite wood panels and finished products sold or used in California. Both imported and domestic products are regulated and must be third-party certified and clearly labeled to indicate they meet California's requirements.

Composite Panel Associates EPP Downstream Program

Products carrying the EPP Downstream logo are manufactured by a company that has demonstrated its environmental commitment by purchasing at least 50% CPA EPP certified composite wood products.

ETL Listed The ETL Listed Mark (Electrical Testing Lab) is proof of product compliance (electrical, gas and oil-fired) to North American safety standards. Products that bear the ETL Listed Mark have met the minimum requirements of widely accepted product safety standards as determined through the independent testing of Intertek, a Nationally Recognized Testing Laboratory (NRTL).

GREENGUARD® Indoor Air Quality Certified Identifies goods with low chemical and particle emissions for use indoors, primarily building materials, interior furnishings, furniture, cleaning and maintenance products, electronic equipment and personal care products. The GREENGUARD® Environmental Institute governs the integrity of the certification process.

GREENGUARD® Children & Schools™ Indoor Air Quality Certified® Identifies low-emitting interior building materials, furnishings and finish systems used in educational, office and other sensitive environments. All GREENGUARD® Children & Schools™ products have been tested for their chemical emissions performance according to CA 01350. The GREENGUARD Environmental Institute governs the integrity of the certification process.

LEED-CI (LEED for Commercial Interiors) LEED (Leadership in Energy and Environmental Design) for Commercial Interiors is a certification program developed by the U.S. Green Building Council that addresses the specifics of tenant spaces primarily in office, retail and institutional buildings. It gives the power to make sustainable choices to tenants and designers, who do not always have control over whole building operations. The green benchmark for the tenant improvement market, LEED for Commercial Interiors establishes high-performance green building criteria for use by both developers and tenants creating interiors that are healthy, productive places to work, are less costly to operate and maintain and have a reduced environmental footprint.

NFSI (National Floor Safety Institute) NFSI product certification is intended to provide product manufacturers the means to have their products independently evaluated for wet slip resistance. For a product to achieve NFSI certification status, it must pass both phases of a most comprehensive evaluation process including laboratory testing and field testing where a product is installed and utilized for a minimum of 30 days.

NSF International NSF International, an independent, not-for-profit organization, helps protect consumers by auditing and certifying as safe: food, water and other consumer products. NSF is a World Health Organization Collaborating Centre for Food and Water Safety and Indoor Environments and an American National Standards Institute (ANSI) accredited standards developer.

SCS Indoor Advantage™ Certified conformance with Business and Institutional Furniture Manufacturer's Association (BIFMA) Standard for Low-Emitting Office Furniture Systems and Seating (ANSI/BIFMA X7.1) and LEED-CI criteria for the U.S. Green Building Council's Leadership in Energy and Environmental Design criteria EQ4.5 (furniture and seating).

SCS Indoor Advantage Gold™ Certified additional conformance with California 01350 Special Environmental Requirements and Collaborative for High Performance Schools (CHPS). In order for a product to qualify for the Indoor Advantage Gold certification, modeled concentrations for individual VOCs (volatile organic compounds) in classrooms and offices must not exceed one-half of the defined CREL (chronic reference exposure levels) threshold. CRELs have been developed for 80 chemical substances. Given that other (uncertified) products and materials in the building may be sources of the same chemicals, the conservative standard set for Indoor Advantage Gold certification is intended to ensure that individual occupants' overall exposure to any one of these chemicals does not exceed the CREL.

Intertek Green Leaf Products have been independently tested and found to conform to multiple existing environmental regulations, such as RoHS (which restricts the use of hazardous substances in electrical and electronic goods), REACH (which regulates chemicals and their safe use) and Eco Design (considers impact on the environment throughout the life cycle of energy related products).

UL Listed Indicates that a product has been tested and certified as safe by Underwriters Laboratories Inc., an independent nonprofit organization that has developed more than 800 standards for safety. UL's web site is at <http://www.ul.com>. Information about UL standards can be found at ul.com/global/eng/pages/solutions/standards/

Adjustable Glides: 1" to 2" leveling devices for stabilizing storage, chairs or panels. Also known as "height adjusters."

Anti-Rebound: The feature that ensures that a drawer will stay closed and not spontaneously recoil or roll out from the pedestal opening when the drawer is closed with normal force.

Apron (on a desk): The recessed desktop area that allows a visitor to sit in close.

Articulating Keyboard: Height-adjustable design swivels, tilts and rotates in order to facilitate the correct ergonomic position for arms, wrists and hands when typing. Retracts under the desk when not in use.

Ball Bearing Slide: A drawer device containing a number of metal or plastic balls that rotate for smooth opening and closing.

Base Cap: A solid cap that fits over a prong of the metal understructure base on a panel system.

Base Cover: The metal or extruded plastic part that covers the electrical power distribution system at the bottom of a panel system's workstation configuration.

Book-Matched Veneers: Sequential veneer sheets, folded to open like the pages of a book and bonded to a substrate board that produces a mirrored image. Common lay-up for most plain-sliced veneers.

Box Drawers: Small drawers, generally 6" in height, mainly in desks and pedestals.

Bridge Worksurface: Attaches between a desk and a credenza to form a U-shaped configuration.

Cantilever: Vertical slotted channels that accept the brackets to hang worksurfaces and storage pieces from systems furniture.

Carbon Footprint: A measure of the carbon emissions that are emitted over the full life cycle of a product or service and usually expressed as grams of carbon dioxide.

Casegoods: Refers to furniture made of hard materials, such as wood, metal, glass or plastic relating to desks, credenzas, bookcases, computer furniture and lateral files.

Caster Sleeve: A metal receptacle into which the casters are inserted.

Catalyzed Lacquer: A modified nitrocellulose-based coating with a catalyst added for enhanced performance and decreased curing time.

Center Drawer (Pencil Drawer): The drawer mounted beneath a worksurface.

C-Legs: An upright furniture support leg in the shape of the letter "C."

Core (Sub-Core): Interior material used to construct veneer panels (i.e., particleboard).

Core-Removable Lock: Designed with a removable cylinder that can be interchanged as needed allowing users to access all furniture with a single key.

Credenza: A storage unit, generally 18" to 24" deep, used with desks in private offices.

Defeat Mechanism: The mechanism that helps prevent the accidental tipping of a file.

Desk—Bow Front: A desk shell in which the surface bows outward away from the user.

Desk—Double Pedestal: A worksurface with pedestals at both ends of the unit.

Desk—Table Desk: Versatile furniture component that functions as a table and/or desk depending on user's needs.

Dovetail: A flaring joint between two pieces of wood, forming an interlocking tight fit.

Drawer Dividers: A partition in a box drawer that separates or divides the front portion from the back portion.

Elevation: A line drawing providing more spatial perception of a furniture layout.

End Panels: Slab end-supports commonly found on either side of a desk worksurface.

Ergonomics: The study of equipment design to reduce operator fatigue and discomfort. A person's relationship and interaction within work environments.

Executive Chair: A high-back or padded chair designed for senior decision-makers.

Face Veneer: The most visible surface veneer.

Fiberboard: A composition board consisting of fine thread-like fibers of wood bonded together with synthetic resins.

File Drawer: A drawer that is generally 12" to 13" in height and deep enough to support hanging file folders.

Flipper Door: The front door of an overhead storage unit, common in systems or office plans.

Follower Block (in a file drawer): Interior drawer panel keeps file folders and other materials upright and toward the front of the drawer.

Footprint: The working square footage required to support a particular function; either a workstation or group of workstations.

Full-Height Pedestals: Pedestals that extend from the worksurface to the floor.

Fully Assembled: Product shipped completely built rather than in parts or as flat stock.

Ganging: The method of joining individual seating elements into one unit. Specifically refers to ganging chairs or ganging tables. Often seen in lounge areas.

Graining: The process of printing a natural woodgrain pattern onto another surface that may or may not be wood product.

Green: A term used in reference to environmentally conscious initiatives, such as recycling or using environmentally sustainable, compostable, reusable or biodegradable and/or energy efficient content in the manufacture of a product.

Grommet: A covering of a cut-out that helps drop wires and cords under a worksurface for wire management.

Guest Chair: Often referred to as a Side Chair, this is a chair used by those who visit an office for the purpose of a meeting or conference.

Hardwood: Designates lumber produced from broad-leafed or deciduous trees in contrast to softwoods from evergreen or coniferous trees.

High Pressure Laminate (HPL): Also known as plastic laminate. Produced by fusing together multiple layers of kraft paper saturated with phenolic resin, with a layer of melamine saturated decorative paper, resulting in higher impact resistance than most other laminates.

Hutch: Storage component with cabinets and/or shelves that sits above a credenza or desk.

Independent Seat and Back: On a chair, seat and back flex independently for automatic comfort.

Inlay: Wood or other material set into corresponding carved out recesses, often producing a pattern.

Interlock Mechanism: A device that couples two or more drawers together to prevent simultaneous opening, averting injuries due to cabinet tipping.

Junction Box: An electrical outlet device or communications port box on an office wall generally requiring access for cord placement and plug-ins.

KD: Shipped Knocked Down or assembly required.

L-Unit: Consists of a front desk piece with a connecting “return” extending on either the “right” or “left” side, normally dependent on columns and entry door positioning.

Laminate: A product made by fusing thin layers of coated paper to an interior substrate.

Lateral File: A file cabinet where the file drawers are wide, as opposed to deep, allowing complete access to all files at once.

Layout: (Space Plan) A plan created by an interior designer or architect showing locations of tenant improvement and space utilization by the tenant.

Leather: Animal skin or hide that is tanned to preserve an otherwise perishable skin and protect it from water damage or bacterial decay. Various tanning methods give leather its unique character and quality. The tanning process lubricates the skin with oil to make it as pliable as possible.

Leather—Bonded: Material made of varying degrees of genuine leather combined with other substances to give the appearance of leather, but at reduced cost.

Leather—Dyed: Three processes are used to dye leather: aniline, semi-aniline and pigment (i.e., opaque color). The aniline process is used on top-of-the-line leather furniture in natural or full-grain leather. For skins with somewhat uneven color, a semi-aniline process is used that combines aniline dyeing and a pigment solution to make the colors more opaque. Pigment is used on the most heavily marked skins to completely cover them with opaque color.

Leather—Full-Grain: The thin, outer layer of a hide. Often the finest, most delicate, best quality and sophisticated in design. Aniline finishes are generally used to preserve full-grain leather.

Leather—Natural: A leather which has a distinctive smooth and supple feel, and a slightly shaded color due to the application of two-tone aniline or semi-aniline.

Leather—Pigment: A more durable leather capable of withstanding higher wear and tear. Made by a mid-priced process using more opaque pigments of semi-aniline dyeing.

Leathermate: Combination leather/vinyl that is a low-cost alternative to full leather upholstery. Typically used in low contact areas of a chair.

Legal Size: Sized for 8½ × 14 documents.

Letter Size: Sized for 8½ × 11 documents.

Leveling Glides: Support device for leveling or stabilizing furniture on uneven flooring.

Louvers: Slats that admit air and light; generally for ventilation or cooling.

Low Pressure Laminate (Melamine or TFM—Thermally Fused Melamine): Results when melamine paper is thermally bonded to particleboard or MDF panels. Offers less impact resistance than HPL.

Lumbar: The lower section of your back between the thoracic vertebrae and sacrum.

Management Chair: A mid-back chair designed for the person who spends a lot of time seated at a desk. Usually a chair with a 5-prong base fitted with casters.

Mechanism: The part of a chair that connects the seat assembly to the base and allows adjustments such as tilt, swivel, seat height, etc., to allow a user optimum comfort and productivity.

Medium Density Fiberboard (MDF): A composite wood product similar to particleboard and made out of wood waste fibers glued together with resin, heat, and pressure.

Melamine: A misused term often thought of as a type of laminate. Actually, it is a component layer found in laminate composites.

Mesh Seat: Seating products that have backs and/or seat cushion support derived from a porous, posture-fitting material.

Mitered: A joinery technique where two solid angled, beveled wood pieces are glued together at the corner.

Modesty Panel (Floating, Formal, Full-Length, Full-Height, Open): A vertical sheet of material on the front of a desk covering the frame, providing privacy and reinforcement. Partial or ¾ modesty panels end approximately 8 inches above the floor. Full modesty panels extend completely to the floor.

Modular Furniture: Groups of freestanding tables, storage pieces and privacy pieces combined to give the appearance of a panel system but offering user-friendly reconfigurability.

Molding: A decorative plane or curved strip giving ornamentation or finishing.

Nesting: Describes pieces of matching furniture in descending sizes that fit inside of each other for the purpose of stacking.

Overhang: A desk's front area that overhangs the body or panels, normally 6" to 12" that allows guests to move closer in.

Panel Systems Furniture: Modular furniture consisting of various height panels dividing space and creating privacy in general office areas. Configured with worksurfaces and storage pieces.

Panels: Modular furniture sections used to define the limits of a workstation. Panels do not extend from floor to ceiling.

Particleboard: A higher quality board composed of distinct wood particles bonded together with a synthetic resin or other glues to form basic flakeboards or higher-quality fiberboards.

Partition: Inside floor-to-ceiling structures not otherwise meeting the criteria of walls. Partitions are movable or removable.

Pedestals: Storage components which consist of drawers in various configurations under a worksurface area.

Peninsula: A rounded-end top used in offices and/or workstations to accommodate meeting space. Also called a pork chop.

Plywood: Wood sheets glued together in three or more laminations.

Pocket Door: Storage doors that recess into the interior cabinet shell.

Polyethylene: The most extensively produced polymer, a lightweight thermoplastic; used especially in packaging and insulation.

Polyurethane: Various polymers used in flexible and rigid foams, elastomers and resins.

Post-Consumer Waste (PCW):

Product that contains recycled material from products that have already been used by the consumer and then collected for recycling.

Posting Shelf: Pullout shelf used to sort and manage documents at the file.

Raceways: Tubes or channels designed to hold, guide and protect electrical wires.

Racking: The swaying that occurs when opening and closing the drawers of a file cabinet. Commercial file cabinets have features such as drawer suspension and leveling glides which prevent racking.

Reconstituted Veneer (Re-Cuts): Thin layers of wood glued together as a block, cut sideways and stained to imitate real wood. Offers particularly stable appearance and pattern consistency.

Recycled (also Recovered) Material:

Material that would have otherwise been disposed of as waste or used for energy recovery, but has instead been collected and recovered (reclaimed) as a material input thus avoiding the use of new primary materials.

Repeat: (Textile Patterns) The length and width measurement of a reappearing design or imprint on a fabric.

Retrofit: The act of improving an existing product with a newly introduced feature or attachment.

Return (V, Bridge, Corner Desk, Desk Return): A piece of furniture with a flat work surface that attaches to a desk to create an “L” configuration.

Reuse: Recovering value from a discarded resource without reprocessing or remanufacture.

Sealants: Finishing topcoat applied to an object by spray or wipe.

Seat Suspension: A system that supports the upper part of the seat assembly.

Shared Space: Two or more workers who share a single workstation and work tools.

Shell: Generally associated with modular office furniture, the desk shell is the sides (end panels), front (modesty panel) and top (work surface) of the desk.

Sled Base: On a chair, a tubular design approach to a chair’s base structure offered in either an arm/leg loop or platform rocker version.

Slipmatched Veneer: The laying out of veneer sheets by sliding each successive one across the next resulting in a repetitive grain pattern across a panel.

Solid Woods: Wood panel or edge piece having minimal 5-mm thickness.

Spin Lift: On a chair, mechanical height adjustment operated by spinning a chair counter-clockwise to raise and clockwise to lower.

Spring-Activated Follower Block: A mechanism to keep files upright when file drawer is partially full.

Square Footage: Length times the width of a room, space, floorplate or fabric product.

Stained Wood: Wood with the natural color modified to some degree—to make it more even and to imitate other wood essences.

Star Base: On a chair, the base to which the casters are attached, having five “arms” and forming the shape of a star.

Suspended Pedestals: Pedestals that are hung from a worksurface and only extend three-quarter depth to the floor. Also known as “¾ pedestals.”

Suspension: The system that is used to support the drawer and facilitate its movement in and out of the pedestal, normally three-quarter or full suspensions.

Sustainability: A characteristic of a process or state that can be maintained at a certain level indefinitely. The term, in its environmental usage, refers to the potential longevity of vital human ecological support systems, such as the planet’s climatic system, systems of agriculture, industry, forestry, fisheries and the systems on which they depend.

Swatch: A fabric sample used for determining finish and color compatibilities.

Task Chair: A chair designed to support individuals who perform task-intensive functions, set on a 5-prong centered base.

Teflon: Brand name of the topical fabric treatments to help repel stains and liquid.

Thermally Fused Melamine (TFM):

Results when melamine paper is thermally bonded to particleboard or MDF panels. Offers less impact resistance than HPL.

Tongue & Groove: A joint made by a tongue on one end of a board fitting into a corresponding groove on another edge.

U-Shape: Assembled desk, return and credenza storage that forms a U layout.

UV Finish: A color or wood finish that is light-baked onto a surface rather than rubbed on and absorbed into wood.

Vein Line: A design element, often called a “reveal,” which produces a visual demarcation of the individual pieces of the desk.

Veneer: Thin sheet of wood, sliced from a log, that is bonded to a panel’s interior substrate.

Veneer Flip: The tonal differences in color due to differing light reflections that occur when two wood surfaces adjoin at a right angle.

Veneer Furniture: Furniture made using thin sheets of wood glued onto a substrate that produces “show wood” quality product.

Veneer Reconstituted (Re-Cuts): Thin layers of wood glued together as a block, cut sideways and stained to imitate real wood. Offers particularly stable appearance and pattern consistency.

Vertical File: Filing units composed of drawers stacked vertically that store records from front to back rather than from side to side.

Waterfall Design: A softened, downward shape of a seat-front behind the back of the user’s legs that prevents nerve pressure, thereby increasing circulation.

Whitewood: Unfinished wood state.

Wire Management: The desktop grommet hole and channels used below the surface to manage cables efficiently.

Woodgrain Furniture: (Faux Wood) Exterior portions of furniture creating the impression of natural wood essence.

Workstation: A space where work is accomplished (inner office, open office area).

Worksurface: The top writing/storage surface areas of a workstation or office.

ICON INDEX

Indicates a product that must be shipped freight.

Indicates a product that requires assembly.

new

Identifies items added since the last edition of this catalog.

Products made with at least 10% total recycled content.

Because there is no universally accepted standard to designate products as environmentally preferable, we have adopted the green leaf symbol to highlight products that have one or more of the following attributes: reduced VOCs, compostable, biodegradable, contains recycled content, or other environmental attributes that make this product less harmful to the environment or humans, when compared to its traditional counterparts. Many of the products marked with the green leaf symbol have been endorsed by third-party certifying organizations, and where applicable, the certifying body's logo appears next to the product's name. Please note that we have not independently verified the environmental attributes

*These environmental attributes refer to the products themselves and not the processes for manufacturing and transporting the products.

Identifies a special order product which requires additional lead time.

Identifies items that cannot be returned.

Indicates the maximum weight a chair can support.

Meets or exceeds ANSI/BIFMA standards for safety and durability.

level™, the BIFMA e3 sustainability standard, was developed in response to the increasing demand for proof that manufacturers are living up to their environmental claims. level™ certification is based on four sustainability attributes: Materials, Energy and Atmosphere, Human and Ecosystem Health, and Social Responsibility.

Products composed in whole, or in significant part, of renewable, biological sources (including plant, animal and marine materials) or forestry materials. Certification is based on a product's biobased (new carbon) content only, as measured by ASTM D6866 test standards.

A business that is not less than 51% owned by one or more women; or in the case of a publicly owned business, not less than 51% of the stock must be owned by one or more women, and whose management and daily operations are controlled by one or more women.

Number indicates hours that item remains fireproof.

Products that meet the recovered material content ranges specified by the EPA through the Comprehensive Procurement Guideline (CPG).

Identifies goods with low chemical and particle emissions for use indoors, primarily building materials, interior furnishings, furniture, cleaning and personal care products and electronics.

Identifies low-emitting interior building materials, furnishings and finish systems used in educational, office and other sensitive environments. All GREENGUARD® Children & Schools™ products have been tested for their chemical emissions performance according to CA 01350.

Products have been independently tested and found to conform to multiple existing environmental regulations, such as RoHS (which restricts the use of hazardous substances in electrical and electronic goods), REACH (which regulates chemicals and their safe use) and Eco Design (considers impact on the environment throughout the life cycle of energy related products).

Made With A renewable plant-based Biopolymer which is a USDA Certified Biobased material.

Conformance with Business and Institutional Furniture Manufacturer's Association (BIFMA) Standard for Low-Emitting Office Furniture Systems and Seating (ANSI/BIFMA X7.1) and LEED-CI criteria for the US Green Building Council's Leadership in Energy and Environmental Design criteria EQ4.5 (furniture and seating).

Additional conformance with California 01350 Special Environmental Requirements and Collaborative for High Performance Schools (CHPS).

Indicates products with a built-in antimicrobial agent which resists the growth of bacteria, mold and mildew that can cause stains, odors and product deterioration.

Products certified as safe for food preparation, consumption and storage by NSF International.

Meets Underwriters Laboratory safety requirements.

Meets ANSI and OSHA standards for step ladder safety.

Certified slip-resistant by the National Floor Safety Institute. For more information see www.nfsi.org.
