

Cookie Use Policy

What are cookies?

A cookie is a small piece of data or message that is sent from a website's server to your web browser and is then stored on your hard drive. They are mainly used to improve your user experience by remembering what is in your online shopping basket or keeping you logged in on a website as you navigate from one page to another.

Cookies can't read data off your hard drive or other cookie files, and do not damage your system.

How we use cookies

First party cookies

The only first party cookies Erudait uses allow Google Analytics to monitor the performance of our website. We plan to use cookies to store login information and remember preferences. We will update this page when this process begins.
