CORE CONCEPT

GUARANTEED TO KEEP THE EARTH GREEN

The heavy SNOWY in the deep winter of January, covering the earth, under the thick snow, the vitality is ready to go, deeply shakes us

SNOWY is a quiet revolution in yarn technology, Thanks for the beautiful snow in the creative process, just like the original intention of YARNS&COLORS, aesthetics and technology, creativity and practice, make every work beyond imagination

HIGH-QUALITY WOOD PULP RAW MATERIALS

ENVIRONMENTAL PROTECTION

PRODUCTION PROCESS IDENTIFICATION

PRODUCT TRACEABILITY

1

ENVIRONMENTAL PROTECTION

Every time a tree is cut down, a new one will be replanted, and more in-depth protection of the land after felling

2

PRODUCTION PROCESS IDENTIFICATION

All production links of wood processing, including the entire chain from log transportation, processing to circulation, are identified to ensure that the final product comes from certified well-managed forests

3

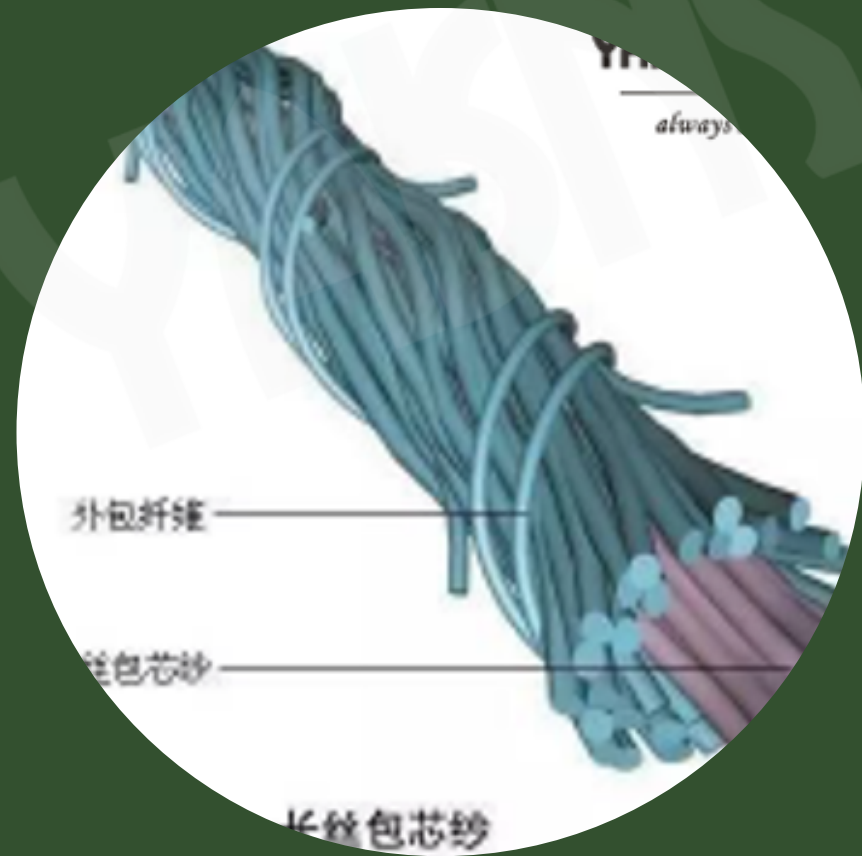

PRODUCT TRACEABILITY

The whole process of products reaching retailers and consumers through trade and manufacturing is traceable

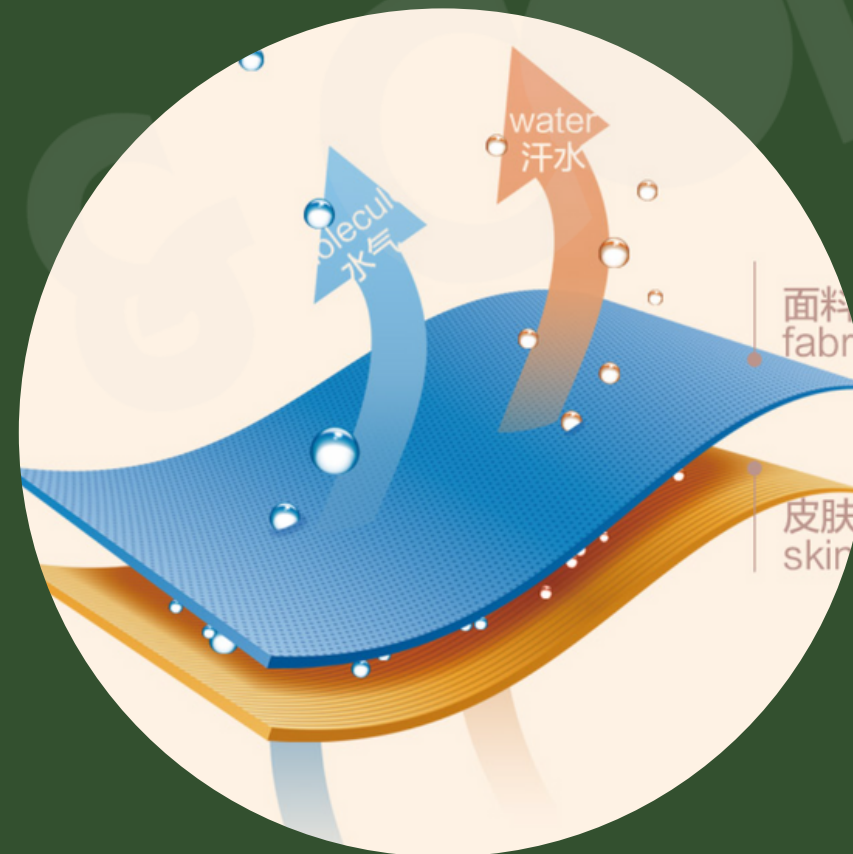

A NEW DEFINITION OF CELLULOSE FIBER FUNCTION REGULATION

Executive standard: American Standard
AATCC 195-2017

*There are different versions of SNOWY yarn,
please contact the salesman if you need the
version with functions such as antibiosis and
perspiration/anti-UV

Elastic core,
strong stretch

Moisture wicking,
dry and comfortable

Executive standard: Chinese standard
GB/T18830-2009

UV PROTECTION, SKIN CARE

Ordinary clothing can only block
30%-90%, anti-ultraviolet fabrics can
block 99% of ultraviolet radiation

Executive standard: Chinese standard
GB/T20944.3-2008

antibacterial, healthy
antibacterial

WARM IN WINTER AND COOL IN SUMMER
"FOUR SEASONS ALMIGHTY FASHION CHAMPION"

FSC PLANTATIONS

FROM NATURE

SNOWY ensures natural comfort for sensitive skin

HIGH QUALITY

Smooth and soft feel comparable to cashmere

WASHABLE AND DURABLE

Repeated wash and dry cycles
Can stay soft all the time, not easy to wrinkle

SEASON CHAMPION

With the superior performance of SNOWY, designers can use it to express freely regardless of men's and women's clothing or the four seasons styles of spring, summer, autumn and winter.

HEALTHY YARN WITHOUT TOXIC BPA

执行标准：美标
加州65

Tests Conducted (As Requested By The Applicant)
Bisphenol-A Content (California Proposition 65):

By Solvent Extraction And Followed By High Performance Liquid Chromatography With Fluorescence Detector (HPLC-FLD)/Liquid Chromatography-Mass Spectrometry (LC-MS/MS) Analysis.

Result (mg/kg)

ND

Remark : ND = Not Detected
Detection Limit = 0.1 mg/kg

双酚A (BPA)

- Chemical raw materials, such as manufacturing polyester, spandex
- As plastic additives, such as plasticizers, flame retardants, antioxidants

TEXTILE PRODUCTION/INDUSTRY

- Sports bra
- Water bottle/baby bottle
- Thermal printer receipt,
- Dental filling sealants, can lining

HEALTH HAZARD

- Endocrine disruption
- Reproductive toxicity
- Increased risk of obesity
- Anxiety, depression, ADHD in children

SUGGESTION

- Stay away from BPA products
- Choose healthy clothing

In the textile manufacturing process, BPA is often added as an intermediate step in the manufacture to improve the natural properties and longevity of the fabric. For example, in the production of polyester fabrics, BPA can be used to make fabrics with moisture absorption, antistatic, and high color fastness to washing, such as spandex; in the production of polyamide textile fabrics, BPA and other bisphenols can be used as color fixing agents.

X

Bisphenol A-free testing and certification
Wearing close to the body requires authoritative testing before you can rest assured
Suitable for infants or sensitive people to wear next to the skin

CARBON FOOTPRINT EVALUATION

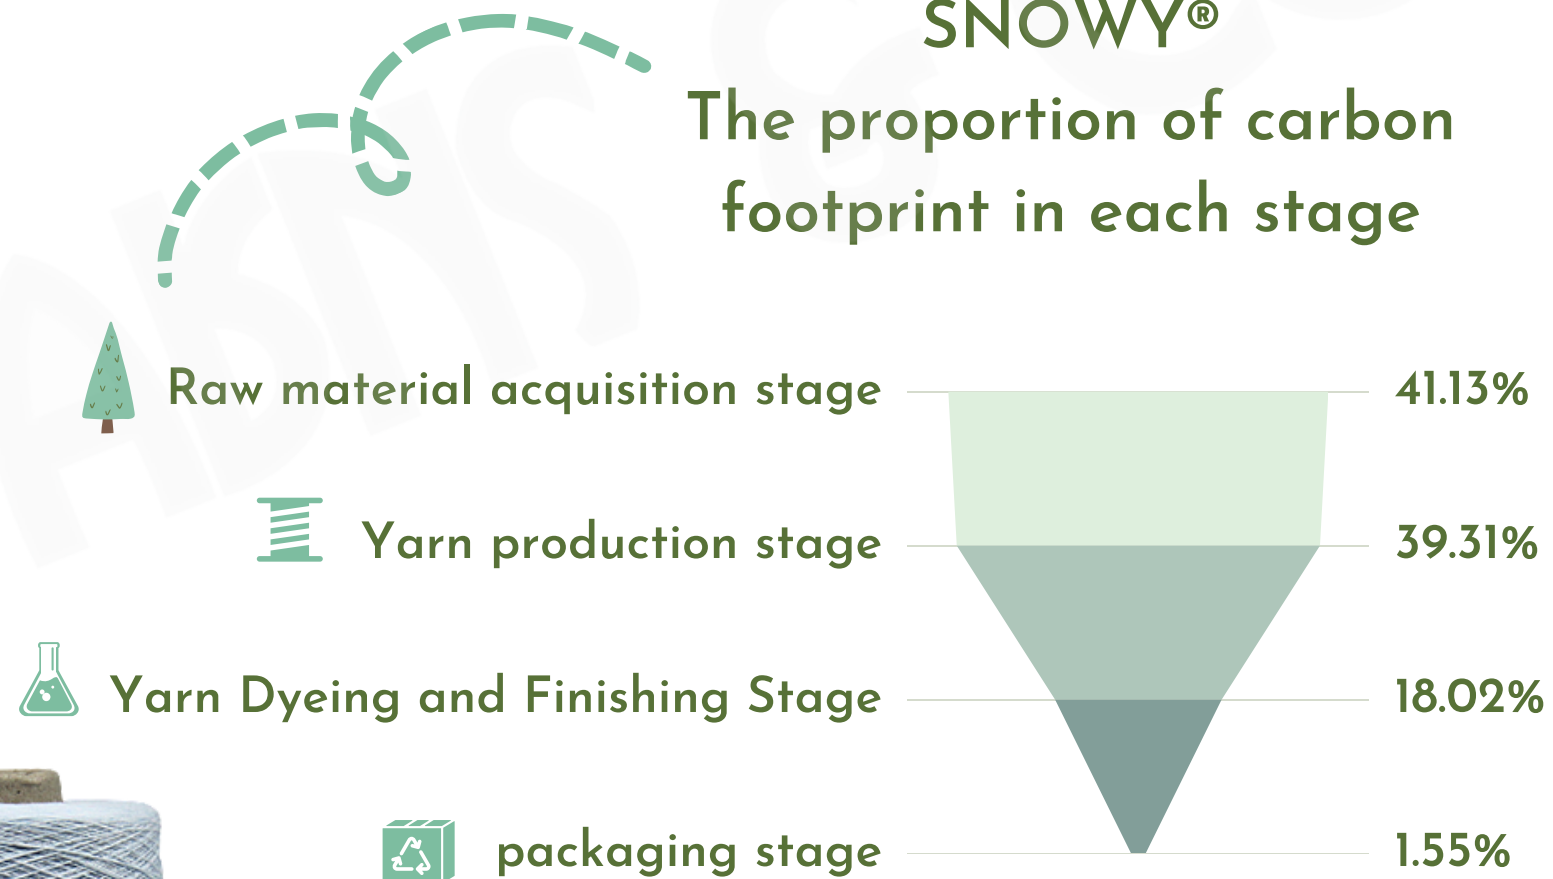

X

Global warming potential (excluding biochar)

SNOWY®
The proportion of carbon footprint in each stage

Data calculation: CNTAC-LCA working group LCAPLUS system
Accounting boundary:
System Boundary: Cradle to Gate
Measured boundary: PBT polyester chip production to finished yarn

LEISURE

SNOWY has upgraded elastic, improves the stability of yarn tension and density, and is comfortable and extensible. It is more suitable for LEISURE, showing its own unique taste, and completely subverting the public's impression of sportswear in the past.

WHOLEGARMENT

The stability of yarn tension and density has become the main yarn in one-piece molding, which reduces the loss of production technology and better reflects the body-fitting requirements and comfort of one-piece molding.

Flexible
Upgraded

√ECOSNOWY Series Instructions

KNITTING:

- Adjust the knitting tension according to different machines.
- Please knit continuously with one cone. Remove 1 meter of the beginning and the end of the yarn respectively while changing yarn cones.
- If the garment is knitted in 2 ends, we suggest to plate and use two cones instead of double system.

WASHING INSTRUCTION:

- We recommend to treat solid sweaters in lukewarm water (max. 30°C) for 10-15 minutes and machine wash for 1-2 minutes
- Knitwears with bright and dark color stripe knitting should be soaked in neutral water with fix agent (3-5%). Please tumble dry after wash.
- To prevent bleeding of colors in washing knitwears with bright and dark color stripe knitting, neutral detergents will be needed and fix agents (3-5%) will be used to avoid change of color fastness.
- Iron at a maximum sole-plate temperature of 110°C, pressing should be avoided.
- ECOWASH products cannot be dry cleaned.

INSTRUCTION:

- Pilling grade: 3-4: has been tested on the collection swatch (same stitch/gauge/tension according to Pilling box (ISO12945-1/GB/T4802.3) at 7200 turns.
- Do not stock yarns for more than 3 months, otherwise elasticity will be changed.
