SUPPLEMENTAL NUTRITION

OSMOLITE® NUTRITIONAL PRODUCTS

Osmolite® 1 Cal

Isotonic tube-feeding formula with caloric requirements of less than 2,000 calories per day. May be used for oral feeding of those with altered taste perception. Source of Complete, Balanced Nutrition® for long-term tube feeding. Provides protein to help support lean body mass and wound healing. Meets or exceeds 100% of the RDIs for 24 essential vitamins and minerals in 1,400 calories (1,321 mL). Isotonic formula for those intolerant of hyperosmolar feedings. Fat blend contains canola, MCT (medium-chain triglyceride) and corn oils, and soy lecithin. Those who absorb lipids improperly may benefit from consuming a formula that contains MCTs as part of the fat source.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
8-oz. can	735	B4150	ea	24/cs
1-L prefilled container	62691	B4150	ea	8/cs

Osmolite® 1.2 Cal

Isotonic tube-feeding formula with low residue for those with limited volume tolerance. Concentrated calories (1.2 calories per mL) and high in protein (18.5% of calories) to help patients gain and maintain healthy weight. Protein is needed for lean body tissue maintenance and repair. Meets or exceeds 100% of the RDIs for 24 essential vitamins and minerals in 1,200 calories (1 L). Fat blend contains high-oleic safflower, canola, MCT (medium-chain triglyceride) oils and lecithin. Those who absorb lipids improperly may benefit from consuming a formula that contains MCTs as part of the fat source. A source of Complete, Balanced Nutrition® and a high-protein, low-residue formula for tube-fed patients who may benefit from increased protein and calories. May be used for oral feeding of those with altered taste perception.

1-L prefilled container	62697	B4150	ea	8/cs
1.5-L prefilled container	62693	B4150	ea	6/cs

Osmolite® 1.5 Cal

Isotonic tube-feeding formula with low residue for those with limited volume tolerance. For sole-source nutrition via a feeding tube. High in calories (1.5 calories per mL) and protein (62.7 g/L) to help users gain and maintain healthy weight. Meets or exceeds 100% of the RDIs for 24 essential vitamins and minerals in 1,500 calories (1 L). Fat blend includes MCT (medium-chain triglyceride) oil. Those with fat malabsorption may benefit from consuming a formula that contains MCTs. Fortified with ultratrace minerals and conditionally essential nutrients – important ingredients for the tube-fed user.

ELECARE® NUTRITIONAL PRODUCTS
Elecare® DHA/ARA Powder

For the dietary management of protein maldigestion, malabsorption, severe food allergies, short-bowel syndrome, eosinophilic GI disorders, GI-tract impairment or other conditions in which an amino acid-based diet is required. Clinically documented to be hypoallergenic to virtually eliminate the potential for an allergic reaction to the formula in multiple food-allergic children. Clinically shown to support growth when used as a primary source of nutrition. 100% free amino acids as protein source. Contains DHA and ARA, nutrients that help support brain and eye development. 33% of fat blend as medium-chain triglycerides, an easily digested and well-absorbed fat source. Does not contain milk protein, soy protein, fructose, galactose, lactose or gluten. 475 calories per 100 g of powder.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
Unflavored, 14-oz. (400-g) can	55251	B4161	ea	6/cs

Elecare® Jr. Powder

Nutritionally complete, amino acid-based medical food for children ages 1 and older. For the dietary management of protein maldigestion, malabsorption, severe food allergies, short-bowel syndrome, eosinophilic GI disorders, GI-tract impairment or other conditions in which an amino acid-based diet is required. Clinically documented to be hypoallergenic to virtually eliminate the potential for an allergic reaction. Effective in maintaining growth of children with cow's milk protein allergy when used as a primary source of calories. 100% free amino acids as protein source. Does not contain milk protein, soy protein, fructose, galactose, lactose or gluten. Halal. 14.1-oz. can, institutional.

SIMILAC® NUTRITIONAL PRODUCTS
Similac® Sensitive®

Easy-to-digest, milk-based formula to help reduce fussiness and gas due to lactose sensitivity. Formula has DHA (Omega 3) and ARA (Omega 6) for brain and eye development, and calcium for strong bones. Contains nucleotides to help support the immune system, prebiotics to help promote digestive health and carotenoids naturally found in breast milk. Clinically shown to support normal infant growth. A unique blend of two carbohydrates to help maximize absorption and minimize malabsorption risks. No palm olein oil. Low osmolality (200 mOsm/kg water).

Similac® Alimentum®

A nutritionally complete, hypoallergenic formula for infants, including those with colic symptoms due to protein sensitivity. A supplemental beverage for children with severe food allergies, sensitivity to intact protein, protein maldigestion or fat malabsorption. Contains a predigested protein to virtually eliminate allergic reactions in most babies who are allergic to cow's-milk protein. Hydrolyzed casein supplemented with free amino acids for infants who are sensitive to or unable to digest intact protein. Starts reducing colic symptoms due to protein sensitivity within 24 hours in most infants. A unique blend of two carbohydrates using two absorptive pathways to help maximize absorption and minimize malabsorption risks. Contains oils that have been shown to be well absorbed. Lactose-free carbohydrate. Ready-to-feed formula is corn-free.

	ITEM #	HCPCS	SOLD BY	CASE QTY.

Similac® Neosure®

A special nutrient-enriched, 22-calorie/fl. oz., iron-fortified formula for conditions such as prematurity. Designed to be used as a preterm, postdischarge formula. Higher levels of protein, vitamins and minerals per 100 calories than standard-term formulas to promote greater weight gain and growth. Significant clinical outcomes: excellent catch-up growth (compared to term formulas), early language and visual development, and improved body composition. Gains in weight, length and head circumference when compared to term formula. Has a patented blend of special breast milk nutrients called nucleotides to help support the developing immune system. Extra calcium and phosphorus to help support bone development.

PEPTAMEN® with PREBIO™

Well-tolerated GI formula with a unique blend of prebiotic fibers. Contains 4 g/L PREBIO™ soluble fiber blend to help promote the growth of beneficial intestinal bacteria to help support digestive health. Balanced peptide profile promotes GI absorption and integrity. Enzymatically hydrolyzed 100% whey protein, which may facilitate gastric emptying. Provides 70% of fat from MCT to decrease potential for fat malabsorption. For the nutritional management of impaired GI functions, including those associated with malabsorption, pancreatitis, short bowel syndrome, chronic diarrhea, Crohn's disease/IBD, cystic fibrosis, delayed gastric emptying, cerebral palsy, malnutrition, malabsorption related to cancer treatment and celiac disease with malabsorption. Also for the management of early enteral feeding and the transition from, or dual feeding with, TPN. 250-mL Tetra Prisma®. Suitable for lactose intolerance, gluten-free, and low-residue diets. **Not for individuals with galactosemia.**

ENTERALITE® INFINITY® Enteral Feeding Pump System

From ICU to home, one pump allows for uninterrupted care. Highly portable, lightweight enteral feeding pump helps tube-fed users maintain feeding while complying with their recommended activity prescription in all care settings. Easy-to-learn, easy-to-use, intuitive design with a user interface that can quickly and easily be mastered and used with confidence from the start. Easy-loading cassette allows for fast, one-handed, consistent pump setup. Accurate: maintains +/- 5% accuracy at any flow rate and when operated in any orientation, allowing users to comply with prescribed feeding regimens. No annual maintenance or calibration; washable under running water.

NUTRICIA (SB/PS)

SUPPLEMENTAL NUTRITION

PRO-STAT®

Pro-Stat® Sugar-Free

Enzyme-hydrolyzed, concentrated protein that is fortified with L-tryptophan. Has 15 g of protein and 72 k/cal per 30 mL (1 oz.) and is sugar- and carbohydrate-free. Rich in arginine, glycine, proline and hydroxyproline, with high nitrogen donor capability to accelerate tissue healing, a critical factor in replenishing depleted protein stores in patients with pressure ulcers, malnutrition and low albumin levels. Clinically proven to have a 96% greater healing rate for pressure ulcers.

Pro-Stat® AWC (Advanced Wound Care)

Enzyme-hydrolyzed, concentrated protein that is fortified with L-tryptophan. Has 17 g of protein and 108 k/cal per 30 mL (1 oz.) with added L-arginine, L-citrulline, L-cystine, vitamin C and zinc. Provides the necessary nutrients to accelerate wound healing in one convenient, low-volume dose. Includes citrulline, an amino acid that raises plasma arginine levels more effectively than arginine itself, allowing for conversion to nitric oxide, essential for wound healing. Rich in arginine, glycine, proline and hydroxyproline, with high nitrogen donor capability to accelerate tissue healing, a critical factor in replenishing depleted protein stores in patients with pressure ulcers, malnutrition and low albumin levels. Clinically proven to have a 96% greater healing rate for pressure ulcers.

NUTRICIA (SB/PS)
SUPPLEMENTAL NUTRITION
UTI-STAT®
UTI-Stat® with Proantinox

A natural urinary tract-cleansing complex containing a proprietary blend of concentrated cranberry proanthocyanidins, ascorbic acid, D-mannose, FOS and bromelain. This inhibits adhesion of infection-causing E-coli bacteria to urinary tract walls, increases urinary acidity to create a less tolerable environment for E. Coli, and stimulates the growth of probiotic bacteria in the small and large intestines. Has been shown effective in reducing symptomatic UTIs, including urgency and frequency of urination, when used in conjunction with hydration and a hygiene program. Helps support urinary tract health and prevent recurrence of infection. Each 1-oz. (30-mL) serving provides as much cranberry proanthocyanidins as approximately five 450-mg cranberry tablets (equivalent to 16 8-oz. glasses of cranberry juice cocktail).

	ITEM #	HCPCS	SOLD BY	CASE QTY.
30-oz. bottle	(PS)60001	B4104	ea	4/cs

MEAD JOHNSON (75)
INFANT/CHILD FORMULAS
NUTRAMIGEN® PRODUCTS
Nutramigen®

Hypoallergenic formula for infants who are sensitive to the intact protein found in milk- and soy-based formulas. Contains extensively hydrolyzed protein proven effective to manage colic due to cow's milk protein allergy. Hypoallergenic, lactose- and sucrose-free. Includes LIPIL®, a blend of DHA and ARA, nutrients also found in breast milk that promote brain and eye development. Fatty acid profile patterned after breast milk. Increased level of choline, which is important for baby's brain development, to be closer to the level found in breast milk.

	ITEM #	HCPCS	SOLD BY	CASE QTY.

Ready-to-feed, 32-oz. can	049911	B4161	ea	6/cs

Nutramigen® with Enflora™ LGG®

Iron-fortified, lactose-, galactose- and sucrose-free, hypoallergenic infant formula for term infants who are allergic to the intact proteins in cow's milk and soy formulas, as well as other foods. Contains extensively hydrolyzed protein to avoid an immune system response. Also appropriate for infants with galactosemia. Clinically proven to effectively manage colic due to cow's milk protein allergy in 48 hours. Contains the probiotic LGG, the most effective strain for infants with cow's milk protein allergy. Proven to promote skin health in infants through 18 months. Proven to promote GI health within one week of use. Includes a blend of DHA and ARA, nutrients also found in breast milk that promote brain and eye development. Fatty acid profile patterned after breast milk. 1,740 calories per 12.6-oz. can.

	ITEM #	HCPCS	SOLD BY	CASE QTY.
Powder, 12.6-oz. can	123901	B4161	ea	6/cs

PurAmino Powder

Iron-fortified, hypoallergenic, amino acid-based infant formula for the dietary management of infants and toddlers with severe cow's milk protein allergy, not effectively managed by an extensively hydrolyzed formula. Also indicated for the dietary management of infants and toddlers with multiple food protein allergies. Designed to provide a sole source of nutrition for infants up to age 6 months and provide a major source of nutrition through 24 months of age, when indicated.

In cases of severe and multiple food allergies or intolerances, PurAmino Powder is sometimes continued as a milk substitute in the diet of children. Includes a blend of DHA and ARA, nutrients also found in breast milk that promote brain and eye development. 2.8 g protein equivalent/100 calories.

Nasogastric Feeding Tubes with Safe Enteral Connections

The feeding port is incompatible with luer lock or IV connections, reducing the risk of accidental connection or infusion. The Entriflex™ has a slimmer, lighter weighted tip for easier insertion.

ITEM #	HCPCS	SOLD BY	CASE QTY.

CORPAK MEDSYSTEMS (CP)

FEEDING TUBES/SETS/SUPPLIES

Farrell Valve Bag Pressure Relief System

Designed to help those who suffer from poor gastric motility, pain and bloating. Maximizes enteral feeding by providing a channel to constantly decompress the stomach, allowing the stomach to feed at its own pace.

ITEM #	HCPCS	SOLD BY	CASE QTY.
204100	B9998	ea	30/cs

CORFLO® Nasogastric Feeding Tubes

Integrated "Y" port minimizes touch contamination and makes flushing easy. ULTRA Anti-Clog outlet port significantly reduces the occurrence of clogging. Flow-through stylet connectors flush and aspirate during the insertion procedure. Water-activated lubricant for greater comfort during insertion and effortless stylet removal. Radiopaque for X-ray confirmation. Weighted tubes use multiple tungsten cylinders, allowing for flexibility and greater comfort during insertion.

CORFLO® Gastrostomy Tubes

Medical-grade, clear silicone is long lasting and provides greater patient comfort by reducing skin irritation. Inflation valve identification provides quick visualization of balloon volume and location of inflation valve. Centimeter markings for identification of French size and balloon volume aid in the initial placement of the tube and identify tube position. Large internal lumen improves flow and reduces clogging. Convenient insertion kit includes prefilled sterile water syringe, gauze pad, lubricating jelly and CORPAK Enteral Y-Extension Set. External retention bolster prevents migration and eliminates need for tape or sutures, and its vented design facilitates air circulation for reduced site irritation and improved stoma healing. Rounded, radiopaque tip improves flow, minimizes clogging, prevents gastric ulceration and is X-ray detectable. 9" length.

DALE® MEDICAL (DA)

FEEDING SETS/SUPPLIES

Dale® ACE (Access Controller for Enteral) Connector®

Closed-system connector with needleless syringe port seal. Protects clinician from infectious splash back. Protects user from external contamination. No disconnect to irrigate or administer liquid medication, and no flip or tethered closure caps. Syringe port seal accepts most 60-cc, catheter tip syringes and provides in line feeding, suctioning, irrigation and medication delivery without the need to disconnect. Split septum silicone syringe port seal means no cap to flip or pop off. Recessed opening to eliminate hand contact and reduce contamination. Flexible silicone adapter accepts all enteral delivery sets and bolus feeding syringes. Replaces 5-in-1 connectors and enteral feeding tube Y-port adapters. Designed to physically prevent the administration of enteral formula into an IV line.

CORE PRODUCTS (95)

FEEDING TUBES/SETS/SUPPLIES

Nelmed G-Tube Holder

NEW

Facilitates most enteral feeding systems designed by the wife of a gastrectomy patient who disliked the way G-tubes were constantly being taped to her husband's skin. Eliminates the need for pins and tape to provide a comfortable way to secure most enteral feeding tubes (PEGs, surgically placed G-tubes, jejunostomy tubes and others). Increases user's ability for self-care and helps minimize the risk of accidental pull-out in combative users or small children.
