

# Early Numeracy

November 11, 2022

# Sarah R. Powell, Ph.D.

Associate Professor  
The University of Texas at Austin

[srpowell@utexas.edu](mailto:srpowell@utexas.edu)

[@sarahpowellphd](https://www.instagram.com/sarahpowellphd)

Say hello.

Describe the mathematics you  
support.

November 2022

### Early Numeracy

- Counting principles
- Connecting number
- Comparison of numbers
- Addition and subtraction concepts

January 2023

### Addition and Subtraction

- Addition computation
- Subtraction computation
- Addition and subtraction fluency
- Addition and subtraction word problems

March 2023

### Place value and money

- Understanding tens and ones
- Representing thousands, hundreds, tens, and ones
- Money

April 2023

### Geometry

- Identification of shapes
- Composing and decomposing shapes

# Instructional Platform

Early Numeracy

Instructional Platform

Instructional Delivery

Instructional Strategies

# Instructional Platform

## INSTRUCTIONAL DELIVERY

Explicit  
instruction

Precise  
language

Multiple  
representations

## INSTRUCTIONAL STRATEGIES

Fluency building

Problem solving  
instruction

## MODELING

Step-by-step  
explanation

Planned examples

## PRACTICE

Guided practice

Independent practice

## SUPPORTS

Ask high-level and low-level questions

Eliciting frequent responses

Providing affirmative and corrective feedback

What math content do you  
model?

How do you engage students in  
guided practice?

Use formal math language

Use terms precisely

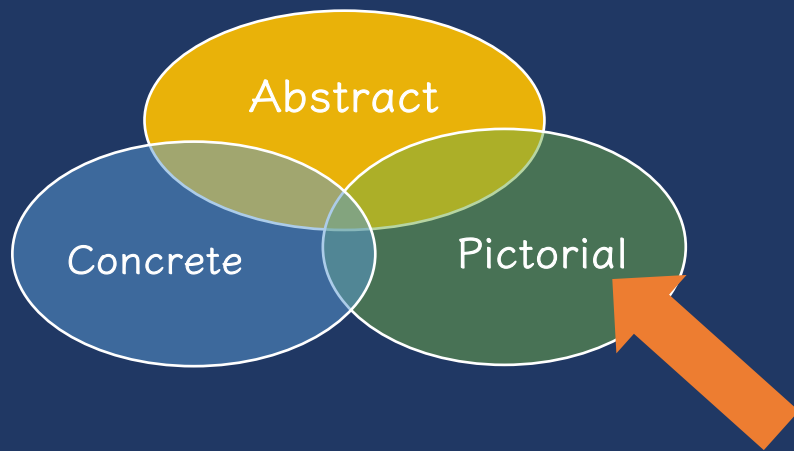

What's one way you support the math vocabulary of students?

What's a hands-on tool you use  
in your teaching?

What's a virtual manipulative  
you use?

# Virtual Manipulatives

Help students see and learn math using different tools!

Number & Operations	Place Value
Fractions & Decimals	Integers & Algebra
Geometry	Time & Money
Data & Probability	Extras

# Counting

## Counting Principles

Stable Order	
One-to-One Correspondence	
Cardinality	
Abstraction	
Order Irrelevance	

What are the difficulties your students have with counting?

# Five Counting Principles

Stable order

One-to-one correspondence

Cardinality

Abstraction

Order irrelevance

# Stable order

Saying the number words in order

“One, two, three, four, five…”

Count from 1 to 20

Count from 1  
to 100

Count  
forward from  
—

Count  
backward

# Stable order

Teacher modeling with echoing

One-minute timings

- *Count to 12 as many times as you can*

Songs

- [www.youtube.com/watch?v=g9EgE\\_JtEAW](https://www.youtube.com/watch?v=g9EgE_JtEAW)
- [www.youtube.com/watch?v=F5QLp9Wxrrg](https://www.youtube.com/watch?v=F5QLp9Wxrrg)
- [www.youtube.com/watch?v=dk9Yt1PgQiw](https://www.youtube.com/watch?v=dk9Yt1PgQiw)
- [www.youtube.com/watch?v=uxPfPyYp84E](https://www.youtube.com/watch?v=uxPfPyYp84E)

Books

Good songs are  
**repetitive**, not based  
on music, and  
focused on lyrics.

# Stable order

How do you model and practice stable order?

# One-to-One Correspondence

Ability to match number words to objects

# One-to-One Correspondence

Ability to match number words to objects

# One-to-One Correspondence

## Partitioning and tagging

- Transferred from the “to-be-counted” category to the “already-counted” category
- A distinct numeral word is assigned and not to be used again in the counting sequence

# Stable Order AND One-to-One Correspondence

Model:

Count to 4.

Count to 7.

Ten Frame

Counting Boards

# Stable Order AND One-to-One Correspondence

Ten Frame				

# Stable Order AND One-to-One Correspondence

Ten Frame				

Model:

Count to 8.

Count to 5.

# Cardinality

The number tag used for the last object in a count symbolizes the total number of objects in a set

- Students **must coordinate** the **stable order** and **one-to-one correspondence**

# Cardinality

Teacher asking, “How many?”

Model:

Count to 11.

Count to 5.

# Abstraction

Any types of objects can be counted together in a set

# Order Irrelevance

The order in which objects are counted does not matter as long as none of the other counting principles are violated

When teaching counting to “inefficient” counters, however, you should teach a strategy – like partitioning and tagging, working left to right, or using a work mat.

# Five Counting Principles

Stable order

One-to-one correspondence

Cardinality

Abstraction

Order irrelevance

- (1) Describe how you teach the three essential counting principles.
- (2) Discuss whether you will teach the two additional counting principles.
- (3) Provide an example of your counting instruction.

# More Counting

Counting objects/pictures

- Bears, cubes, clips, pencils
- Abacus
- Table setting
- Passing out papers

Counting with storyboards

# Counting

## Counting with number lines

## Counting on

- I'm hiding three. Count, starting from the hidden counters.*

# Counting

## Finger counting

# Counting

In virtual settings, how can you help students with finger counting?

# Ordinal Counting

Numbers relative to their position in time or space

- First, second, third, fourth, fifth...

# Ordinal Counting

Modeling and activities for counting can be used plus:

- Lining up in classroom
- Running a race and determining place
- Following steps in a recipe
- Calendar dates
- Chapters in a book

# Ordinal Counting

## Ordinal Numbers

### ***The Napping House***

First (1st)	Second (2nd)	Third (3rd)	Fourth (4th)
Fifth (5th)	Sixth (6th)	Seventh (7th)	Eighth (8th)

# Skip Counting

Counting by 2s, 5s, and 10s

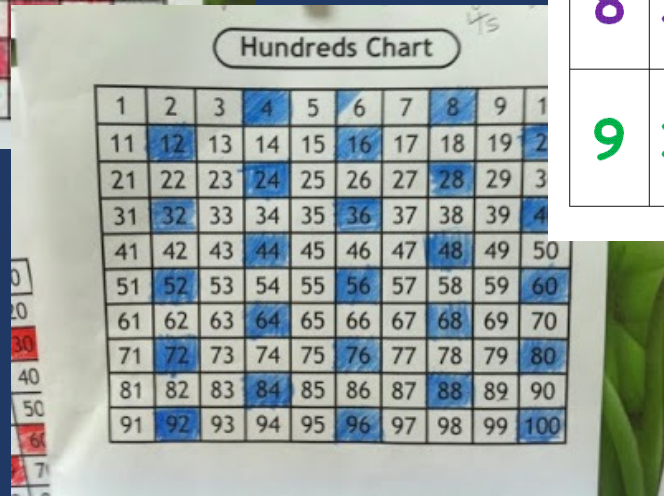

Hundred Chart									
1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

# Instructional Platform

## INSTRUCTIONAL DELIVERY

Explicit  
instruction

Precise  
language

Multiple  
representations

## INSTRUCTIONAL STRATEGIES

Fluency building

Problem solving  
instruction

## MODELING

Step-by-step  
explanation

Planned examples

## PRACTICE

Guided practice

Independent practice

## SUPPORTS

Ask high-level and low-level questions

Eliciting frequent responses

Providing affirmative and corrective feedback

What are your strengths with  
modeling counting?

What are your opportunities for  
growth?

Use formal math language

Use terms precisely

What are five essential math vocabulary for counting?

What are the representations  
you'll use to teach counting?

# Connecting Number

## Three Representations of Number

--

## Comparing Numbers

Build a Tower

Less than	$<$	More than

What are the difficulties your students have connecting numerals, number words, and quantity?

# Zero

Most important digit in Base-10 system

Typically introduced after 1, but should be introduced alongside 1

# Zero

# Zero

Describe activities to help students understand zero.

# Three Representations of Number

7

seven

# Numerals and Number Words

## Numerals

- 0, 1, 2, 3, 4, 5, 6, 7, 8, 9...

## Number words (cardinal)

- one, two, three, four, five...

## Ordinal numerals

- 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>, 5<sup>th</sup>...

## Ordinal number words

- first, second, third, fourth, fifth...

# Numerals and Number Words

1

Straight down and then you're done.  
That's the way to make a one!

2

Around and back on the railroad track.  
Two! Two! Two!

3

Around the tree, around the tree.  
That's the way to make a three!

4

Down and over. Down some more.  
That's the way to make a four!

5

Across the top, then take a dive.  
Make a big round tummy, now that's a five!

6

Make a loop, then make a hoop!  
Six! Six! Six!

7

Across the top, down for the win.  
That's the way to make seven!

8

Make an "S," but do not wait.  
Go back up to make an eight!

9

Make a hoop and then a line.  
That's the way to make a nine!

0

Around, around, around you go.  
That's the way to make zero!

# Numerals

Describe activities to help students write their numerals.

# Numeral, Number Word, and Quantity

# Numeral, Number Word, and Quantity

# Literature

Literature should have **three** representations of number

Literature should be accurate

Objects should be easy to count

- (1) Describe how you connect numerals, number words, and quantities.
- (2) Provide an example for 5, five, and \*\*\*\*\*.

# Instructional Platform

## INSTRUCTIONAL DELIVERY

Explicit  
instruction

Precise  
language

Multiple  
representations

## INSTRUCTIONAL STRATEGIES

Fluency building

Problem solving  
instruction

## MODELING

Step-by-step  
explanation

Planned examples

## PRACTICE

Guided practice

Independent practice

## SUPPORTS

Ask high-level and low-level questions

Eliciting frequent responses

Providing affirmative and corrective feedback

What are your strengths with modeling connecting number?  
What are your opportunities for growth?

Use formal math language

Use terms precisely

What are five essential math vocabulary for connecting number?

What are the representations you'll use to teach connecting number?

# Comparison of Numbers

## Three Representations of Number

--

## Comparing Numbers

Build a Tower

Less than	$<$	More than

What are the difficulties your students have with comparison?

# Quantity Comparison

Vocabulary:

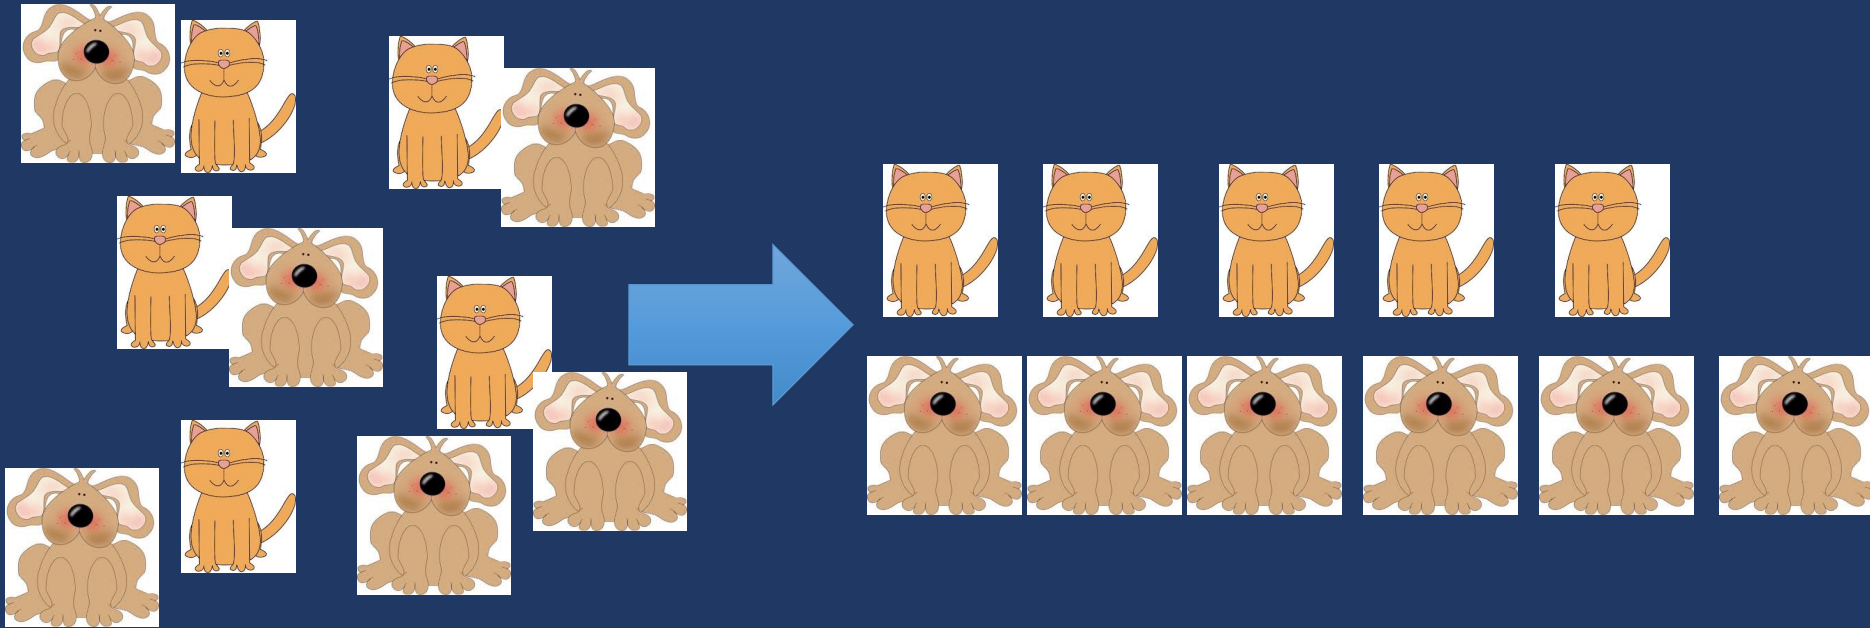

- More, greater, bigger
- Less, smaller, fewer
- Same, as many as

# Quantity Comparison

## Teacher modeling

- Find the pairs
- Finish when one group runs out of items
- Figure out more than, less than, or equal

# Quantity Comparison

## Build a Tower

Less than	7	More than

Circle the group that has more items.

# Quantity Comparison

Make chains

Bear compare

Counting cars

# Comparison

Describe activities to help students with comparison.

Subitizing

# Subitizing

Instantly seeing how many

Young students can subitize sets of 1, 2, or 3 without counting (perceptual subitizing)

- 4 or 5 is the maximum subitizing amount

Students can subitize larger amounts by combining smaller amounts (conceptual subitizing)

# Subitizing Instruction

# Subitizing

Is it important to practice subitizing?

How do you practice subitizing?

# Instructional Platform

## INSTRUCTIONAL DELIVERY

Explicit  
instruction

Precise  
language

Multiple  
representations

## INSTRUCTIONAL STRATEGIES

Fluency building

Problem solving  
instruction

## MODELING

Step-by-step  
explanation

Planned examples

## PRACTICE

Guided practice

Independent practice

## SUPPORTS

Ask high-level and low-level questions

Eliciting frequent responses

Providing affirmative and corrective feedback

What are your strengths with  
modeling comparison?

What are your opportunities for  
growth?

Use formal math language

Use terms precisely

What are five essential math vocabulary for comparison?

What are the representations  
you'll use to teach comparison?

# Addition and Subtraction Concepts

Addition

--	--

What are the difficulties your students have with comparison?

Addition	Subtraction
Multiplication	Division

# 100 addition facts

Single-digit addends sum to a single- or double-digit number

$$\begin{array}{r} 5 \\ + 4 \\ \hline 9 \end{array}$$

(addend)  
(addend)  
(sum)

# Total

# Addition

Count one set, count another set, put sets together, count sum

$$2 + 3 = 5$$

# Total

## Addition

Count one set, count another set, put sets together, count sum

Model:

$$4 + 5$$

$$9 + 3$$

# Change

Addition

Start with a set, add the other set, count sum

$$2 + 3 = 5$$

# Change

## Addition

Start with a set, add the other set, count sum

Model:

$$4 + 5$$

$$9 + 3$$

# Total

# Addition

**Parts** put together into a **total**

Karly saw **4** cardinals and **5** blue jays. How many birds did Karly see?

Total

Addition

**Parts** put together into a **total**

Write a total story.

# Change

Addition

An amount that **increases** or decreases

Premila had \$4. Then they earned \$5 for cleaning their room. How much money does Premila have now?

# Change

Addition

An amount that **increases** or decreases

Write a change (increase) story.

- (1) Model  $3 + 9$  as a total problem.
- (2) Model  $3 + 9$  as a change problem.
- (3) Discuss how to distinguish between total and change.

## Subtraction

--	--

# 100 subtraction facts

Subtrahend and difference are single-digit numbers and minuend is single- or double-digit number

$$\begin{array}{r} 16 \\ - 8 \\ \hline 8 \end{array}$$

(minuend)  
(subtrahend)  
(difference)

# Change

## Subtraction

Start with a set, take away from that set, count difference

$$5 - 3 = 2$$

# Change

## Subtraction

Start with a set, take away from that set, count difference

Model:

$$9 - 3$$

$$11 - 7$$

# Difference

Subtraction

Compare two sets, count difference

$$5 - 3 = 2$$

# Difference

Subtraction

Compare two sets, count difference

Model:

$$9 - 3$$

$$11 - 7$$

# Change

Subtraction

An amount that increases or **decreases**

Bronwyn had **9** cookies. Then they ate **2** of the cookies. How many cookies does Bronwyn have now?

# Change

Subtraction

An amount that increases or *decreases*

Write a change (decrease) story.

# Difference

Subtraction

Greater and lesser amounts compared for a difference

Rachel has 9 apples. Jodie has 2 apples. How many more apples does Rachel have? (How many fewer does Jodie have?)

# Difference

Subtraction

Greater and lesser amounts compared for a difference

Write a difference story.

- (1) Model 12 – 5 as a change problem.
- (2) Model 12 – 5 as a difference problem.
- (3) Discuss how to distinguish between change and difference.

# Building Fluency

Fluency is  
doing  
mathematics  
easily and  
accurately.

Fluency in  
mathematics  
makes  
mathematics  
easier.

Fluency  
provides less  
stress on  
working  
memory.

Fluency  
helps  
students  
build  
confidence  
with  
mathematics.

With fluency, it is important to emphasize both  
conceptual learning and procedural learning.

Addition	Subtraction
Multiplication	Division

Counting

Comparing  
numbers

Counting  
coins

Telling  
time

Identifying  
equivalent  
fractions

Knowing  
multiples

Identifying  
shapes

Knowing  
formulas

Addition	Subtraction
Multiplication	Division

Build fluency with math facts.

- Addition: single-digit addends
- Subtraction: single-digit subtrahend
- Multiplication: single-digit factors
- Division: single-digit divisor

$$\begin{array}{r} 5 \\ + 8 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ - 4 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 7 \\ \hline \end{array}$$

$$\begin{array}{r} 56 \\ \div 8 \\ \hline \end{array}$$

Cover, Copy, Compare

$$\begin{array}{r} 9 \\ \times 6 \\ \hline 54 \end{array}$$

$$\begin{array}{r} 7 \\ \times 8 \\ \hline 56 \end{array}$$

$$\begin{array}{r} 9 \\ \times 9 \\ \hline 81 \end{array}$$

$$\begin{array}{r} 6 \\ \times 7 \\ \hline 42 \end{array}$$

$$\begin{array}{r} 8 \\ \times 8 \\ \hline 64 \end{array}$$

$$\begin{array}{r} 8 \\ \times 6 \\ \hline 48 \end{array}$$

$$\begin{array}{r} 6 \\ \times 5 \\ \hline 30 \end{array}$$

$$\begin{array}{r} \times \\ 6 + 4 = \end{array}$$

$$7 + 3 =$$

$$2 + 7 =$$

$$5 + 6 =$$

$$4 + 7 =$$

$$7 + 8 =$$

$$6 + 7 =$$

$$7 + 9 =$$

$$7 + 6 =$$

$$8 + 7 =$$

$$7 + 0 =$$

$$9 + 6 =$$

$$6 + 0 =$$

$$6 + 8 =$$

File Folder

$$6 + 3 =$$

$$1 + 7 =$$

Taped Problems

$$\begin{array}{r} 6 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ \times 6 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ \times 9 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 8 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ \times 8 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ \times 8 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 6 \\ \hline \end{array}$$

$$\begin{array}{r} 7 \\ \times 7 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 9 \\ \hline \end{array}$$

$$\begin{array}{r} 5 \\ \times 9 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ \times 4 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 9 \\ \hline \end{array}$$

$$\begin{array}{r} 9 \\ \times 5 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ \times 7 \\ \hline \end{array}$$

$$\begin{array}{r} 6 \\ \times 7 \\ \hline \end{array}$$

$$\begin{array}{r} 8 \\ \times 8 \\ \hline \end{array}$$

$$\begin{array}{r} 4 \\ \times 8 \\ \hline \end{array}$$

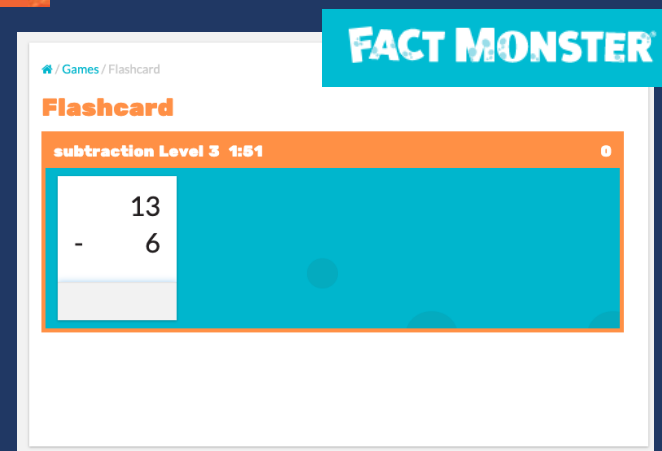

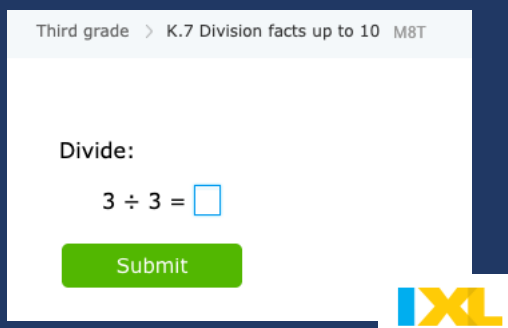

$$\begin{array}{r} 5 \\ \times 7 \\ \hline \end{array}$$

[illegible]

DAILY and  
BRIEF

# Instructional Platform

## INSTRUCTIONAL DELIVERY

Explicit  
instruction

Precise  
language

Multiple  
representations

## INSTRUCTIONAL STRATEGIES

Fluency building

Problem solving  
instruction

Addition	Subtraction
Multiplication	Division

Describe three activities to help students with fact fluency.

## MODELING

Step-by-step  
explanation

Planned examples

## PRACTICE

Guided practice

Independent practice

## SUPPORTS

Ask high-level and low-level questions

Eliciting frequent responses

Providing affirmative and corrective feedback

What are your strengths with  
modeling addition and  
subtraction?

What are your opportunities for  
growth?

Use formal math language

Use terms precisely

What are five essential math vocabulary for addition and subtraction?

What are the representations you'll use to teach addition and subtraction?

### Explicit Instruction

Problem

Step-by-Step Explanation

1. Choose a math problem.
2. Write a step-by-step explanation. Focus on the language of math in your explanation. Consider the representations you will use.

## Explicit Instruction

Problem

Practice Opportunities

High-Level Questions

Low-Level Questions

Affirmative Feedback

Corrective Feedback

1. Describe the practice opportunities you will use.
2. Write 3 high-level questions.
3. Write 3 low-level questions.
4. Write 2 ways to provide affirmative feedback.
5. Write 2 ways to provide corrective feedback.

## Explicit Instruction

Problem

Step-by-Step Explanation

1. Teach your problem.

What were your strengths with your teaching?

What are your opportunities for growth?

November 2022

### Early Numeracy

- Counting principles
- Connecting number
- Comparison of numbers
- Addition and subtraction concepts

January 2023

### Addition and Subtraction

- Addition computation
- Subtraction computation
- Addition and subtraction fluency
- Addition and subtraction word problems

March 2023

### Place value and money

- Understanding tens and ones
- Representing thousands, hundreds, tens, and ones
- Money

April 2023

### Geometry

- Identification of shapes
- Composing and decomposing shapes
