Some Concluding Notes

Tom Miller's 1937 diary is sparse in January and February, however it is clear that by mid February, Tom & Elinor had arranged to move to the Mitchell farm, located near Waverly. The move itself took almost two months. On February 25, Tom had two loads of shale delivered to the farm since the drive was in terrible condition. Then, for the next month and a half, Tom Miller and his son George worked about the Mitchell farm getting it ready for farming. In mid March they began moving the livestock. Thereafter, Tom and George would often spend the night at the Mitchell farm, only to get up early and head back to the Murray farm for breakfast and chores there. The house itself was put in order last, linoleum being put down on May 1st. Finally, on May 5th, the move was completed.

May 5, Wednesday, 1937. We moved today. Uncle Will Baucom brought two loads in his truck. Mr. Charles Pyle brought one load in his truck and Paul Barker brought one load with his truck. Elinor and I came in our car with the rear seat piled full. We stopped in Auburn and got some groceries and overtook the trucks at Auburn junction of 4 and 104. Elinor had a dandy dinner considering the short time she had to work in.
