## WOMEN'S HEALTH, CAREGIVING & ALZHEIMER'S

A Program in Honor of Alzheimer's & Brain Awareness Month

Women are at the  
epicenter of the  
Alzheimer's crisis.

Not only are they more likely than men to be caregivers, women are also more likely to develop the disease. Additionally, one quarter of dementia caregivers are "sandwich generation" caregivers, taking care of both an aging parent and children.

JOIN US to learn from experts on the 10 Warning Signs of Alzheimer's and Isolation and Mental Health. Hear local caregivers share their stories and tips for caregiving.

Thursday, June 10

6 to 7:30 p.m.
