

ANTI-CORROSION SELF-ADHESIVE TAPE

Anti-corrosion tape is made with specially bended stabilised polyethylene backing and coated with butyl rubber adhesive.

Applications:

The tape provides corrosion protection to pipes, flanges, valves, etc. which are at high risk of getting corroded.

The tape is solvent free and creates a robust barrier against water. It protects metal surfaces underwater, underground and in the most demanding outdoor conditions.

The tape won't peel or crack and is very easy to apply under extreme conditions.

Sr. No.	Description	Units	Observed Values
1	Thickness	mm	0.70 ± 0.1
2	Elongation	%	> 350
3	Specific Electrical Resistance	ohm.m ²	≥10 ¹¹
4	Impact Resistance @ 23°C	Joule	> 15
5	Adhesion Strength to primed pipe @ 23°C	N/mm	> 1.5
6	Adhesion Strength to primed pipe @ 50°C	N/mm	> 0.11
7	Operating Temperature	°C	-25 to +80
