

Kyle W. Bennett, Assoc. AIA

Kyle is a graduate of Louisiana State University with degrees in Architecture and Business Administration. He joined Moss Architects, Inc. in September 2014. He has a strong interest in the cultural and architectural roots of Louisiana and the Gulf Coast, and strives to design architecture that draws from the local identity, cultural heritage, tectonic language, and unique landscapes of coastal Louisiana.

Kyle is fascinated with the unique ecosystems of Louisiana's wetlands and how the built environment interacts with the natural environment, and vice versa. His senior design thesis at LSU focused on designing a sustainable, hurricane-resistant, multipurpose building in the coastal marshes of the Sabine National Wildlife Refuge which served as a center for ecotourism and an outpost for wildlife/fisheries personnel.

EDUCATION

2014 Bachelor of Architecture
Louisiana State University, Baton Rouge, LA
