

Supportive Care

At Clarendon, we strive to make our clients as comfortable as possible. While we encourage independence as much as possible, at times, assistance with activities of daily living may be needed. In order to meet our goal of ensuring the best possible experience, we will provide our clients with assistance in the following areas:

- Eating and drinking (including hydration encouragement)
- Dressing (following bathroom visits)
- Walking
- Bathroom visits
- Medication reminders

Clarendon also is equipped to accommodate clients in wheelchairs.
