

# Moon Tracker

SUN	MON	TUE	WED	THU	FRI	SAT
						
						
						
						
			<p>Observe the moon nightly for one or more months, keeping to the same observance time each night for accuracy. Sketch a circle for each night by shading in the portion of the moon you do not see in the sky. Write the date beneath each moon sketch. Over time you should see a pattern of Moon phases!</p>
