

Large Shade Tree Replacement Program – Spring 2018

Many of the largest trees in Haverford Township have been lost over the past 20 years. For the most part, they have reached the end of their expected life cycle, since most were planted 75-100 years ago when our Township neighborhoods were developed. While the Township has planted replacement street trees over the years, the species have generally been small and medium-sized varieties, such as the Bradford Pear, Flowering Plum, Crabapple, and Kwanzan Cherry.

Large-species trees enhance the environment exponentially over smaller varieties. Every leaf on a tree creates oxygen and filters pollutants in the air. Each foot of shade-providing canopy reduces the work of air conditioners in the summer. Each inch of root mass improves storm water management and the filtration of water-borne pollutants. In addition to environmental benefits, the grandeur of large trees creates a sense of history and place for the Township, enhancing the quality of life and raising property values.

In order to protect our tree cover, Haverford Township Tree Tenders, an all-volunteer tree planting group will be working with the Township on replacing those largest trees. This year, we are offering 50 free trees to residents who will plant the largest sized shade trees (50' or taller at maturity) in their front yard.

- Trees are subject to availability and are offered on a first-come, first-served basis – usually one per address. Spring 2018 planting days are Saturday, April 21st and Sunday, April 22nd. Interested residents must fill out and return the order form with a signed waiver by April 1st.

Free trees are large-species trees only. Trees available this year (each in limited supply): Sugar Maple 'Fall Fiesta', Red Maple 'Autumn Spire', Swamp White Oak, London Plane Tree, Honeylocust 'Skyline', Linden 'Sterling' and American Elm 'Prairie Expedition'. The descriptions of the trees and photos can be found on our website at www.haverfordtreetenders.org.

- Trees must be planted on the lawn side of the sidewalk unless your planting strip is 48" or wider.
- Trees may not be planted directly under wires, but may be set back into the lawn if wires are present.
- Residents should mark the spot with a stake where you would like the tree planted before April 9th so Public Works can dig the hole in advance. Please make a hose or large bucket of water available on the planting day.
- Resident must agree to water the tree once a week in mild to hot weather when we don't have significant rainfall that week. After planting, trees should be watered weekly until November, and again in the spring, summer, and early fall of 2019.
- Contact Tree Tender Coordinator Jeanne Angell at angellsrus@comcast.net if you have questions.

Free Large-Species Tree Request Form – Spring 2018

Trees are ordered on a first-come, first-served basis – usually one per address. Trees must be planted on the lawn side of the sidewalk unless the planting strip is 48” or wider. Interested residents must submit the order form and signed waiver by April 1st.

Name(s) _____ Date _____

Trees are subject to availability and are offered on a first-come, first-served basis. There are limited quantities of each variety. Please mark 1 for your first choice, 2 for second choice, and 3 for third choice:

___ Sugar Maple ___ Swamp White Oak ___ ~~London Plane~~ ___ Linden
___ Red Maple ___ American Elm ___ Honey Locust

If you would be interested in a second street tree if one is available, please indicate here what your selection would be: _____

Dear Resident,

Haverford Township is providing this tree at no cost to you. Acceptance of this tree removes all responsibilities from Haverford Township for the following: all maintenance, all trimming, all storm damage, all tree removal, or any other damage that may be caused by or to this tree. This waiver includes any successor or assignees.

Additional responsibilities:

- Volunteer tree planters will plant your tree on Saturday, April 21st or Sunday, April 22nd. Residents must mark the spot where you would like the tree planted with a stake by April 9th, so Public Works can dig the hole in advance. Please make a hose or large bucket of water available on the planting day.
- Resident must agree to water the tree once a week in mild to hot weather when we don't have significant rainfall that week. After planting, trees should be watered weekly until mid-November, and again in the spring, summer, and early fall of 2019.

Larry Gentile, Township Manager

I have read and understand and I will follow the regulations and responsibilities contained above.
