

# Welcome to our **Bowling Center!**

*Our job is to deliver a great experience to our customers  
Your "job" is to enjoy yourself in a safe manner*

**Following these  
simple rules  
will help to ensure a great & safe time.**

**Teachers and helpers, if you see any student playing it "unsafe"  
(from the list below) please let them know or one of the staff on duty**

- Only the person bowling is allowed in the bowling area by the ball return. If multiple players are in the bowling area at a time someone may get hit with a bowling ball. Please have anyone not bowling stay on the top of the step where the seating is
- Crossing the foul line - the line right before the lane itself - will result in an injury. There is an invisible layer of oil on the other side of that foul line. If a ball, pin, or personal item gets stuck down the lane **DO NOT** walk down the lane under any circumstance. Please get a staff member for assistance.
- Food and beverages can only be at the seating area and back. Absolutely NO food or beverages can be down in the bowling area. If there is a **SPILL** please notify a staff member ASAP.
- Everyone **MUST** wear **bowling shoes**. If the shoes get any liquid on the bottoms of them it may cause an injury. Please return any wet shoes to the front for a new pair.
- To prevent tripping hazards, be sure personal items such as shoes, coats, and bags are hung up or are underneath your seat and not in any walking paths.
- Improper play - This is typically when bowlers through a ball into the bowling machine when its not ready. The arm that sweeps the pins back is NOT meant to hit with a ball. Bowlers who intentionally hit this arm can cause significant damage to the bowling machine. If a ball gets stuck please wait for a staff member for assistance. Trying to hit a ball with another will only make both balls get stuck and increase the possibility of damage to the equipment
- Always remember we are here to serve you! Report anything that interferes with your safe fun.
