A vibrant illustration of the solar system. On the left, a large, glowing orange and red Sun dominates the frame. Several planets are shown in various colors and sizes, orbiting the Sun along white elliptical paths. From left to right, the planets include Mercury (small, grey), Venus (yellowish), Earth (blue and white), Mars (reddish), Jupiter (orange and white stripes), Saturn (yellow with rings), Uranus (light blue), and Neptune (dark blue). A comet with a bright white nucleus and a long purple and blue tail is visible in the lower-left quadrant. The background is a dark, starry space with some nebulae and light flares.

Pluto?

A stylized image of Saturn with its rings, overlaid with a white rectangular box containing the text "Questions?". The planet and rings are rendered in a golden-brown color against a dark background. A white circle is centered over the planet, and a white rectangle is centered over the rings. The text "Questions?" is written in a white, sans-serif font across the center of the image.

Questions?
