FROM RUSSIA WITH LOVE

For those who find caviar's glistening, black pearls a necessary indulgence, the Black Caviar Company has something to smile about. In conjunction with Russian Caviar House, the Black Caviar Company has reintroduced the total culinary decadence of Osetra caviar to the US. Through their sustainable methods, the companies have developed a way to bring the highest quality, certified Russian sturgeon caviar to North America and in doing so, breaks a decade long embargo on the import of those luxurious, briny pearls.

"We are proud to be the first and only company to distribute authentic Russian Black Caviar in the United States," said Gabriel Goldfine, Black Caviar Company's Caviar Ambassador. Arriving to your door in an elegant, presentation box and available in a variety of price points; Osetra is a delectable indulgence.
