What to question ?

Everything (intelligent, good social skill)

Why to question ?

A need (curiosity, must know, making conversation) arises to ask questions

When to question ?

Now (intelligent, good social skill)

PLAGIARIZE

Plagiarize to build on & advance new ideas. Why rewrite something that is well written. Rather use it & expand on it. Evolution build's on existing & then creating new. Media should do the same.

Rewriting is time wasting & not in the best interest of broadening the mind. A good piece of writing should be cherished not be mutilated by rewriting. Reading a good piece of writing encourages the mind to lift one's intellect to the high standard of the original. Stopping this thinking to concentrate on rewriting is mediocre time wasting.

WRITING

Writing makes us civilized it helps us to communicate with others. Writing allows to comment, fantasy & report.

Writing is part of Knowledge Continuity.

Writing starts with an outline. List the points that you want to make in order of importance. Cover each point fully. No summary is needed when the material is clear & informative.

Then decide what more research is needed. Let the outline grow in your mind. Rewrite outline.

You are ready to create!

The lead should be ?style. It will convey vital information about what's following, in the shortest & simplest way. A lead needs to persuade the reader to continue reading.

The main part (story) presents anecdotes, facts, opinions, fiction. Opinions must be active & personal. Presentation needs to be interesting encouraging to read on to the end.

The finished original needs editing (don't edit while writing, it disrupts your writing flow) . Don't edit straight away. Sleep over & when refreshed, edit (next day or later) . Editing is needed for rewriting. Editing looks at lead, readability, grammar, punctuation, wordage, accuracy & flow of story.

Add art work, drawings, images & graphics were needed. Editing & rewriting should be done at least 3 times with a sleep over (next day or later) in between.

Finished editing. **Run:** spell check & grammar check. **Add final:** color, images & audio were needed. **Make your work**

'copyright free' & then publish.

SPEECH CRAFT

Take the time to get to know the topic well, of your speech. Organize your presentation so it flows logically from plot to plot. Rehearse speech.

In your mind decide what the speech is meant to achieve. A technical speech is educational, informs, instructs, presents: new products, services & technology. It's factual, precise,... An emotive speech presents the personal view of the speaker. This speech presents arguments & gives biased opinions. So as try to persuade the audience to agree & support the Speaker.

Note ! Seeking varied opinions from the audience makes it a debate.

You have decided on the type of speech. You have completed your research. Now decide on the main points & lesser points that you want to present. Write down the main points as a separate paragraph for each. Elaborate on these points using your research material.

Read the paragraphs, decide in what order to present them. Select aids, display, audio, video, animals, people ... Read the paragraphs, make small notations which props you intend to use in each.

Read the paragraphs using aids. Time & Evaluate presentation. Make changes as needed. After changes hold another presentation. Repeat this until you are happy with your presentation.

Speech is too long: shorten paragraphs, reduce main points, reduce aids... **Speech is too short:** add lesser points, add props...

Speech is too boring: add a bit of humor, add aids...

Speak clearly, not fast, no mumbling with appropriate pauses.

You are happy with your speech. Now rehearse the speech as often as you can. If possible get a second opinion of your presentation. Rehearse, Rehearse..

The audience is ready. You are ready. You look neat, with a cheerful disposition, big smile flashing your teeth. On the lectern in front of you is your tablet showing in bold the main points & aid notes.

There is also filtered chilled water.

You welcome the audience. Have a drink of water. Start your presentation.

At the end of the speech do not thank the audience. Accept humbly their applause. Congratulations!

NARRATOR

A Narrator is a character or voice that tells a story.
