Model	Fork Size	Manufacturer	Fork Rate	Oil Level	Rear Spring	Race Sag	Weight	Suggestions
RM 85	37mm	Showa	0.28	115mm	4.6kg	95mm	110lbs ±10	A softer rear spring which will help balance the suspension better, but fork springs might be soft for aggressive mini riders. Spring rates and valving is very crucial for the mini racer
RMZ 250	47mm	Showa	0.45	360cc	5.4kg	100mm	165lbs ±10	Very well balanced suspension for experienced & novice racers. Lighter racers will need to lighten up valving and spring rates.
RMZ 450	47mm	Showa	0.48	370mm	5.8kg	100mm	180lbs ±10	Forks and shock set up for aggressive Expert racer. We suggest a revalve & respring for lighter, less aggressive, vet racers.

2011 Suzuki Suspension Tips

Model	Tips
RMZ 450	NOTE: Special tools are required for disassembly/assembly of rear shock or piston & x-ring damage will occur.
