## WORLD SERIES POINTS STANDINGS PROPOSAL 2018

In an effort to improve the weekly points distribution I proposal a system that will clearly assign points for each round played during the World Series season. The system will include a point assignment for every golfer playing each week and the final standings will be based on all golfers participating in the World Series Tournament.

## Current

The first place finisher of each round with 8 or more World Series golfers would be eligible for points. Therefore if there were 8 DGA members playing but only 7 were in World Series no points would be awarded to the first place finisher. In addition, if the first place finisher was not in World Series or the winner was already in World Series then the points went to the next highest finisher. April $19^{\text {th }}$ and July $22^{\text {nd }}$ rounds respectively are good examples of this.

## Proposal

In the last few years the decrease in the number of golfers per round, the number of rounds per year and the number of World Series participants has exposed some of the flaws in the current point system. I propose an entire change to the points system which addresses the flaws and mixes the current points system with the old philosophy when "Legs" were awarded. This new system will promote participation because each time you play you receive points

All the current standard World Series rules apply but the points distribution will be modified. Each golfer playing in a round will be awarded points. For example, a round with the minimum number of golfers (8) the first place finisher will be awarded 200 points and each subsequent golfer will receive a number of points less than the first place finisher (see the points table on the last page). As the number of players increase the point values will increase. Incremental increases in points will be similar to the current stages.

|  | Players | 1st Place Pts |  |
| :---: | :---: | :---: | :---: |
|  | 8 |  | 200 |
| 9 | to | 12 | 300 |
| 13 | to | 16 | 400 |
| 17 | to | 20 | 500 |

| 21 | to | 30 | 600 |
| :--- | :--- | :--- | :--- |
| 31 | to | 40 | 800 |

Each player will receive points every round except on each of the four World Series Days. At the end of the World Series points season which is the Wednesday before World Series Championship the point winners will be determined by removing from the standings all golfers not eligible for World Series, golfers who have opted out of World Series or golfer who have won a World Series Day or the World Series Aggregate Winner. All other players in the standings will move up and the winners will be awarded.

## Compare Old vs. New

Below is a comparison between the current 2017 standings and the standing applying the new points method.

The standings on the left is the points totals of all players for the entire 2017 World Series season. The standings on the right is the final standings after all players who either aren't eligible, opted out or won a World Series Days or the World Series Aggregate winner were removed.

In this method Jim Rinaldi would have replaced Mansour Rismanchi but Bob Nowark would have still remained in the World Series Championship.

## Final Analysis

This modification to the points system addresses many of the flaws. Most importantly the first place finishers of individual rounds as well as World Series Day or Aggregate winners will no longer have an immediate impact on weekly points awarded because now each week all golfers will receive points regardless of their status in the tournament. Additional this system does favor those players who participate more often in weekly rounds which should promote more participation in the league. But the current points system and the previous "Leg" method also favored those who played more often. The four World Series Days is still there for those golfers who don't participate as often but still want a chance to enter the World Series Championship.

As the league evolves things like the World Series Championship must evolve with it to stay fresh and relevant. My goal is to continue to make this the best and most interesting tournament it can be, and I believe I have done just that. Please consider this as a viable next step in the evolution of the World Series Championship.
