## ABOUT US

FOR OVER 28 YEARS, ROADPLATES.COM HAS BEEN THE LEADER OF ROAD PLATE RENTAL AND SALES BECAUSE OF OUR EXPERIENCE IN STEEL PLATE AS WELL AS TRENCHING AND SHORING. OUR BUSINESS IS LOCATED IN WALPOLE, MASSACHUSETTS. WE PROUDLY PROVIDE SAME DAY SERVICE TO NEW ENGLAND, AND NEXT DAY SERVICE NATIONALLY.

WE OPERATE 24 HOURS A DAY, 7 DAYS A WEEK, 365 DAYS A YEAR. WE ARE THERE FOR OUR CUSTOMERS, PROVIDING EMERGENCY SERVICES AND TOP QUALITY STEEL MATERIALS THAT ASSIST YOU IN KEEPING OUR ROADS, CONSTRUCTION SITES AND MUNICIPALITIES SAFE DURING ALTERATIONS.

## GETTIN YOU COVERED EASY AS A... B... C

**A**

**SIZE THE JOB**  
Plan out your trench/job dimensions, duration and conditions.

**B**

**REVIEW SAFETY REQUIREMENTS**  
Find out exactly what you need according to OSHA and DOT standards

**C**

**CALL ROADPLATES.COM**  
We will help you make sure your getting what you need to start and complete a job.

**D**

**SET UP DELIVERY & PICKUP TIMES THAT WORK FOR YOU.**  
Reserve your plates and schedule your delivery and pick up times.

## PRODUCTS & SERVICES

24 HOUR PLATE RENTAL	1" ASTM A36 STEEL PLATE	DOT APPROVED ANTI-SKID
24 HOUR PLATE SALES	VARIETY OF WIDTHS	PLATE LIFTING NUTS
WIDE VARIETY IN STOCK	PLATE 1" x 1' up to 10' x 40'	SWIVEL LIFTING RINGS
COMPETITIVE RATES	SHALLOW PLATE	SAFE-T-STICK TAG POLE

## GIVE US A RING

Our offices are open 24 Hours a day to serve your immediate needs. Please call our office today, or contact a rep below, for product information or a free quote.

**STEEL ROAD PLATE ANTI-SKID  
SURFACING INFORMATION GUIDE**

WINTER, 2017

**DON'T  
SLIP  
UP  
ON  
SAFETY.**

**ROADPLATES.COM** has been at the forefront of the anti-skid surface movement. We have been applying anti-skid epoxy to plate surfaces since 2010 when the City of Boston first mandated anti-slip surfacing to battle hazardous conditions. Years of refining the process and working closely with manufacturers have enabled us to hone the process and materials involved in the anti-skid application. We are beyond confident that our product cannot be rivaled in price, performance or quality.

**GENERAL**

Road plates are generally used as a supportive element over trenches, holes and other unstable or hazardous ground conditions. During winter months, or in climate weather, steel plates become a hazard themselves as they become increasingly slippery when cold or wet and can form ice patches on or around their surface. Cold, wet and icy plates are a slipping hazard to crews and pedestrians alike as well as vehicles passing over them. It is for this reason that many major cities who experience in climate weather months (Boston, Manhattan etc.) require anti-skid road plates for high traffic roads and sidewalks.

**BENEFITS OF ANTI-SKID SURFACING**

Many contractors prefer anti-skid plates as they provide employees a safer work environment, minimizing risk and liability. Applying anti-skid surfacing to contractor-owned road plates enables contractors to remain competitive in services offered throughout cities and states of varying requirements. The anti-skid surfacing reinforces the concept of safety throughout procedure.

**SAFER

**BENEFITS**

- **REDUCES LIABILITY AND RISK OF ACCIDENTS RESULTING IN INJURY.**
- **ENABLES IMMEDIATE SERVICE IN TERRITORIES REQUIRING ANTI-SKID SURFACING.**
- **MEETS ALL CURRENT SAFETY REGULATIONS AND STANDARDS.**
- **REINFORCES AND DISPLAYS COMMITMENT TO SAFETY THROUGHOUT PROCESS.**

**OUR PRODUCT**

SkidGuard is the result of technology derived from a decade of vigorous polymer science research and team development within the Lockheed Martin Missile and Space Company. Easy and safe to use, SkidGuard is a thin build, single package, water dispersed, reactive, synthetic polymer resin. It forms a durable, hard, fully-adhered, aggregate filled coating providing excellent skid resistance for steel road plates, for concrete, metal or prime coated wood platforms, ramps and stairs, for steel expansion joints on bridge decks, for marine applications and for many other surfaces in need of skid resistance.

**WHY SKID GUARD?**

- Single Package:** no limiting pot life factor
- Tenacious adhesion** after proper installation and curing
- Rapid Curing at modest temperatures:** leaves a traffic bearing surface in as few as two hours. Fully cures in 12 hours above 55° F and dry.
- Resistant** to scuffs, bacteria, algae and industrial pollutants.
- Low-Volatile Organic Compound (VOC),** air quality compliant throughout the United States under all present and pending air quality legislation governing industrial coatings.
- Odor-friendly.** Formulated to minimize applicator impact. Indoor application potential.
- Non-hazardous in cured form;** therefore, may be disposed of into any municipal landfill.

- ✓ **Certified Non-Skid Coating**
- ✓ **ASTM C 1028 Certified**
- ✓ **Successfully Field Tested**
- ✓ **Made with Recycled Materials**
- ✓ **Aggregate-Filled**
- ✓ **Asphalt Based**
- ✓ **Easy to Apply with Roller or Spray**
- ✓ **Application**
- ✓ **Single Component**
- ✓ **Cost Effective**
- ✓ **Environmentally Friendly**
- ✓ **Safe to Use**

Due to SkidGuard's superior performance and safer application process, contractors and municipalities alike agree SkidGuard is the preferred Anti-Skid Surfacing for Plates and any other Metal or Concrete Surfaces.
