

The “New” Oracle Database Appliance

It's so easy to deploy, it's like a walk in the park...

A simple, reliable and affordable solution for small and midsize organizations

The new Oracle Database Appliance X6-2 family comes in four variants for every size of company – and even gives you two choices of Oracle Database edition. Optimized for your needs, it contains all you need in a single package that's simple to install and manage. And it's very affordable too! The ODA X6-2 is a complete database solution comprising Oracle Database Enterprise Edition or Standard Edition/SE1/SE2, along with systems software, server, storage, and networking. All the components are engineered by Oracle to work together – so a single DBA can install and deploy it in less than 90 minutes. It helps you minimize database downtime risks and losses while boosting your efficiency and productivity.
