Health Tips

Neurobics for your mind. Get your brain fizzing with energy. American researchers coined the term 'neurobics' for tasks which activate the brain's own biochemical pathways and to bring new pathways online that can help to strengthen or preserve brain circuits.

Brush your teeth with your 'other' hand, take a new route to work or choose your clothes based on sense of touch rather than sight. People with mental agility tend to have lower rates of Alzheimer's disease and age-related mental decline.

CURRENT EVENTS

The "Momo challenge" is a challenge that targets children specifically. It will pop up on their video games, their you tube videos, and even on their social media. It is a creepy like doll figure that is encouraging children to do dangerous things that involve self harm and can lead to suicide by giving them the false perception that their playing a game or participating in a challenge hence the momo challenge is very dangerous so parents please stay alert. This is not a game and it is not funny. We only get one opportunity with our children so please do not be naive to this. As saints we will fight and we will win.
